CONGESTED WEEK LOAD & GPS INTENSITY REVIEW

Club report — MAUNA data only

Mon, 05/10/26 · 2026-09-29 → 2026-10-05

01 Martin Adeline leads HMLD (9.9 km) and HSR (2.9 km) with elevated monotony (1.29) and strain (15,229), signaling repetitive high load. Body soreness (mean 16/60) remains manageable.

02 Miro Muheim accumulated 7.9 km HMLD and highest sprint exposure (961 m, 43 sprints) with low monotony (0.54) and stable wellness (soreness 20/60).

03 Shafiq Nandja shows converging signals: 6.9 km HMLD, 2.2 km HSR, monotony 0.85, strain 14,013, and highest body soreness (mean 27/60, min 20) – worth monitoring for fatigue accumulation before weekend.

STAFF READ

2026-09-29 → 2026-10-05

Identify athletes accumulating the highest external load and GPS intensity during the congested midweek period before the weekend fixture.

NARRATIVE THREAD

- Martin Adeline leads HMLD (9.9 km) and HSR (2.9 km) with elevated monotony (1.29) and strain (15,229), signaling repetitive high load. Body soreness (mean 16/60) remains manageable.
- Miro Muheim accumulated 7.9 km HMLD and highest sprint exposure (961 m, 43 sprints) with low monotony (0.54) and stable wellness (soreness 20/60).
- Shafiq Nandja shows converging signals: 6.9 km HMLD, 2.2 km HSR, monotony 0.85, strain 14,013, and highest body soreness (mean 27/60, min 20) – worth monitoring for fatigue accumulation before weekend.

SIGNALS

INFO Martin Adeline leads HMLD (9.9 km) and HSR (2.9 km) with elevated monotony (1.29) and strain (15,229), signaling repetitive high load. Body soreness (mean 16/60) remains manageable.

INFO Miro Muheim accumulated 7.9 km HMLD and highest sprint exposure (961 m, 43 sprints) with low monotony (0.54) and stable wellness (soreness 20/60).

INFO Shafiq Nandja shows converging signals: 6.9 km HMLD, 2.2 km HSR, monotony 0.85, strain 14,013, and highest body soreness (mean 27/60, min 20) – worth monitoring for fatigue accumulation before weekend.

MARTIN ADELINE

2026-09-29 → 2026-10-05

MA

Martin Adeline
MIDFIELDER

- 9.9 km HMLD (highest), 2.9 km HSR, 762 m sprint distance across 5 sessions. Monotony 1.29 and strain 15,229 signal repetitive high load. Body soreness mean 16/60 (min 10) and mood 14/60 suggest manageable wellness despite volume.

Player	N	HMLD (m)	Monotony	Strain	Soreness	Soreness Min
Martin Adeline	4	9.93	1.29	15,229.37	16.25	10

MIRO MUHEIM

2026-09-29 → 2026-10-05

MM

Miro Muheim
FULL BACK

- 7.9 km HMLD, 2.7 km HSR, 961 m sprint distance (43 sprints) – highest sprint exposure. Monotony 0.54 and strain 3,802 indicate varied load. Body soreness 20/60 and mood 20/60 stable across 6 sessions.

Player	N	HMLD (m)	Monotony	Strain	Soreness
Miro Muheim	2	7.89	0.54	3,801.58	20

SHAFIQ NANDJA

2026-09-29 → 2026-10-05

SN

Shafiq Nandja
MIDFIELDER

- 6.9 km HMLD, 2.2 km HSR, 651 m sprint distance across 5 sessions. Body soreness mean 27/60 (min 20) and mood 21/60 – highest soreness in the watchlist. Monotony 0.85 and strain 14,013 suggest consistent high load with emerging wellness dip.

Player	N	HMLD (m)	Monotony	Strain	Soreness (mean)	Soreness Min	Mood (mean)
Shafiq Nandja	4	6.92	0.85	14,012.77	27.25	20	21.25

NICOLAI REMBERG

2026-09-29 → 2026-10-05

NR

Nicolai Remberg
DEFENSIVE MIDFIELDER

- 8.6 km HMLD (second highest), 1.8 km HSR across 6 sessions. Body soreness 10/60 and mood 10/60 (minimal flags). High volume with low wellness impact – monitoring for delayed fatigue response.

Player	N	HMLD (m)	Soreness	Mood
Nicolai Remberg	3	8.59	10	10

TOP 8 HMLD ACCUMULATION – KPI HMLD KM

TOP 8 HSR VOLUME – KPI HSR KM

TOP 8 SPRINT DISTANCE – KPI SPRINT KM

- Martin Adeline and Nicolai Remberg top HMLD exposure. Miro Muheim leads sprint volume (961 m). Shafiq Nandja combines high HMLD with elevated body soreness (27/60). Alexander Røssing-Lelesiit shows elevated soreness (30/60) with moderate HMLD (5.9 km).
- Scatter shows Shafiq Nandja (6,917 m HMLD, soreness 27) and Alexander Røssing-Lelesiit (5,922 m, soreness 30) with elevated wellness flags. Martin Adeline (9,926 m, soreness 16) and Nicolai Remberg (8,594 m, soreness 10) tolerate high volume with minimal reported soreness.

RECOMMENDATIONS

2026-09-29 → 2026-10-05

- Martin Adeline: Consider modified session intensity or volume reduction before weekend fixture given elevated monotony (1.29) and strain (15,229) despite stable wellness. Miro Muheim: Monitor sprint recovery given highest sprint exposure (961 m, 43 sprints) across 6 sessions. Shafiq Nandja: Priority watch – convergi...
