28 May 2026 → 9 October 2026

Confidential · Staff only

COACH BRIEF

Fait moi un bilan toute typologies confondu des donnees de la saison actuelle

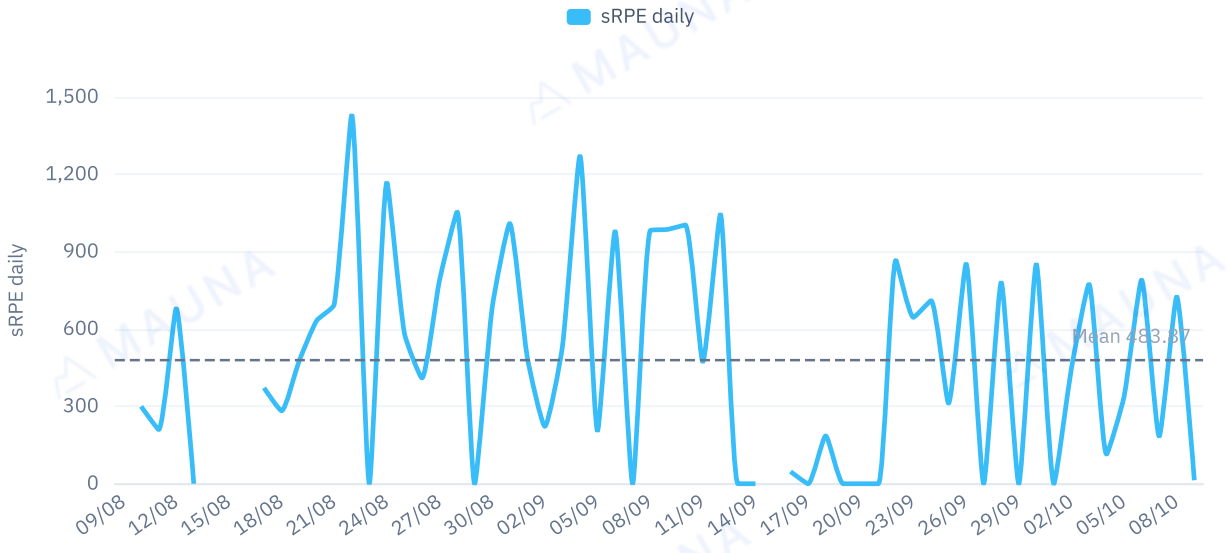

TRAINING DAYS	GPS SESSIONS	VALD TESTS
62	30	19

INJURY EVENTS	ACTIVE ROSTER
10	11

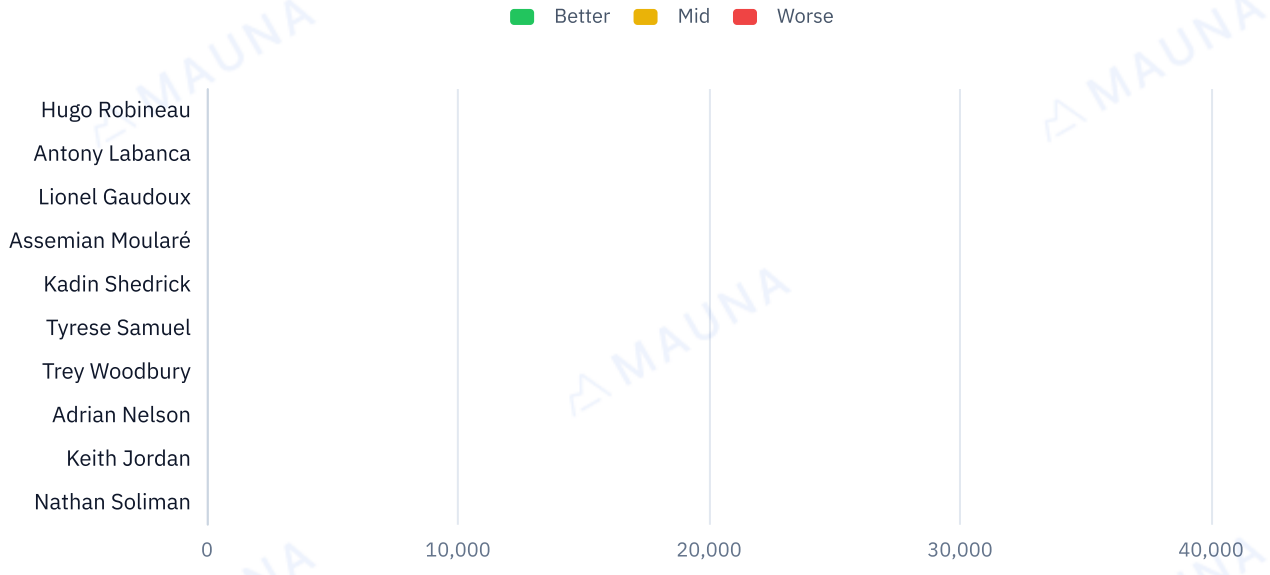

MAUNA

Internal load monitoring via sRPE shows consistent team-level training volumes across the 19-week period, with top 10 athletes accumulating substantial session loads. Team mean sRPE daily evolution tracks training load trends across the season.

sRPE daily — team mean

sRPE total — Top 10

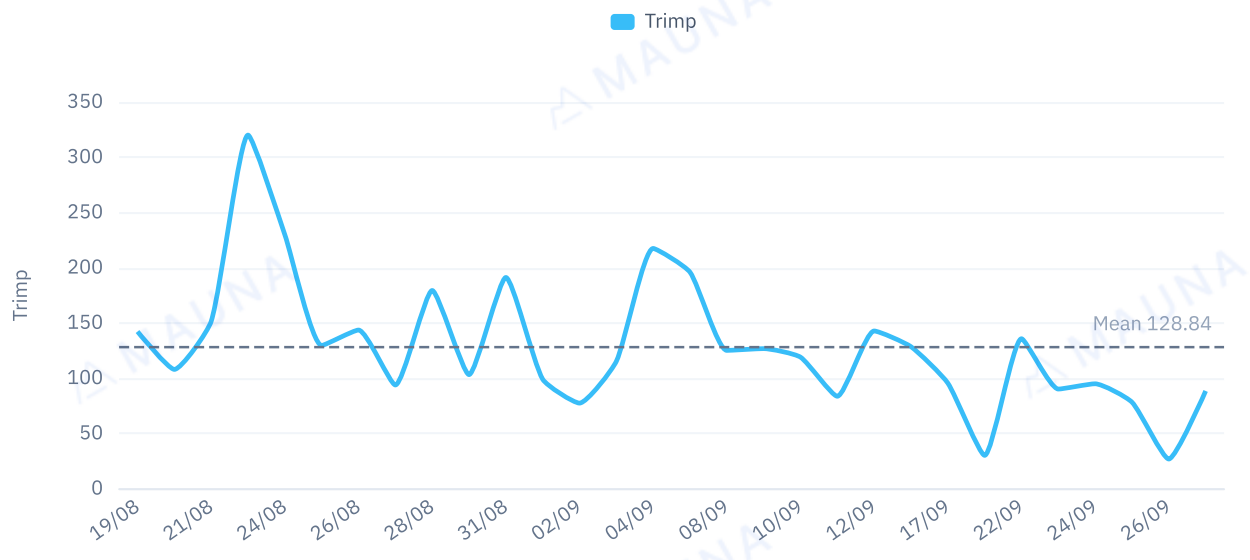

GPS & External Load

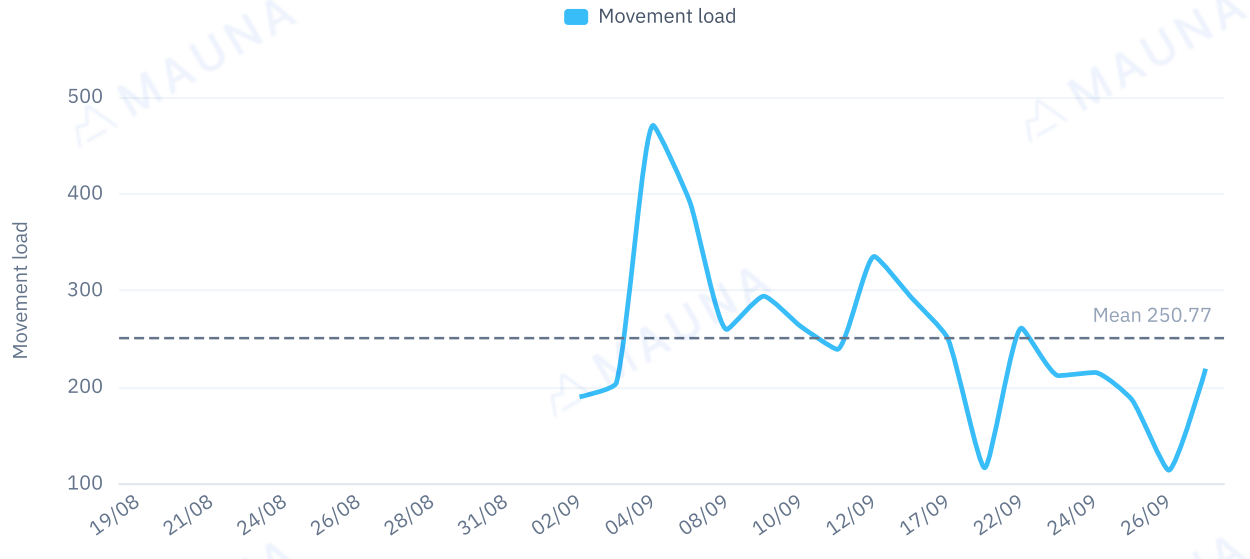

30 SESSIONS

External load metrics (TRIMP, Movement Load, EPOC, RMSSD, Zone 5 time) demonstrate varied intensity distributions, with clear leaders in high-intensity exposure. TRIMP, Movement Load, EPOC final, and RMSSD team means illustrate external load and HRV patterns.

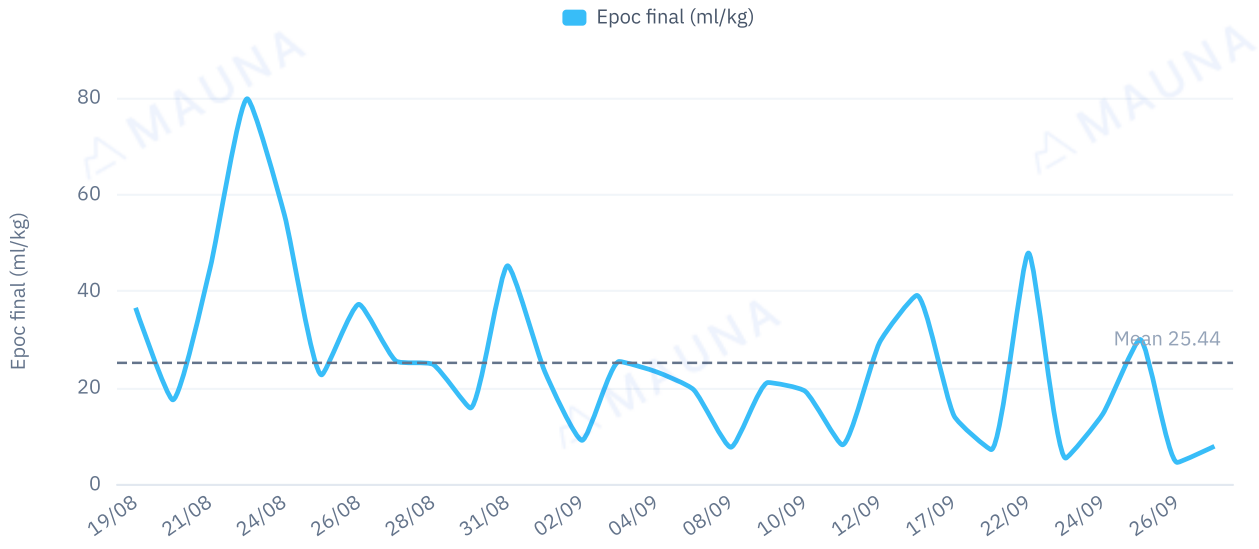

TRIMP — team mean

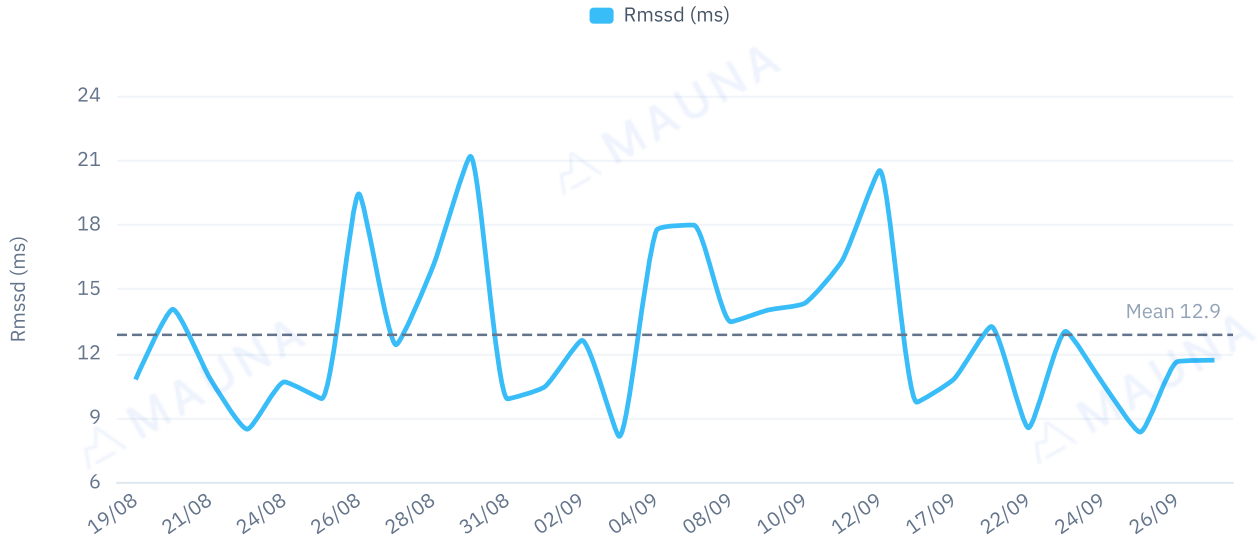

Movement Load — team mean

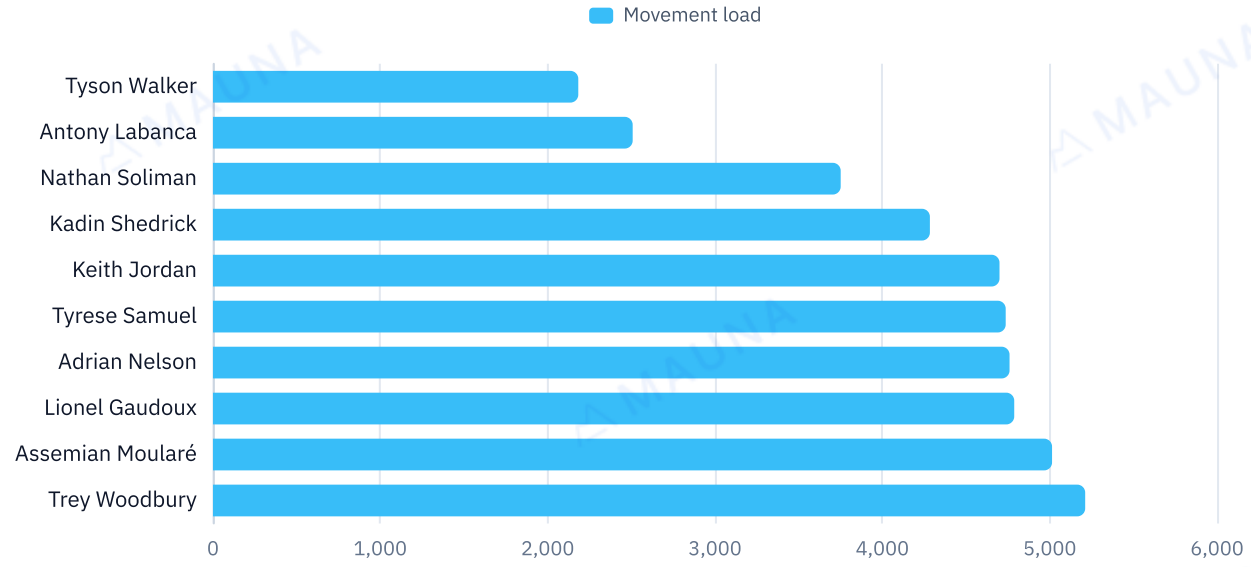

EPOC final — team mean

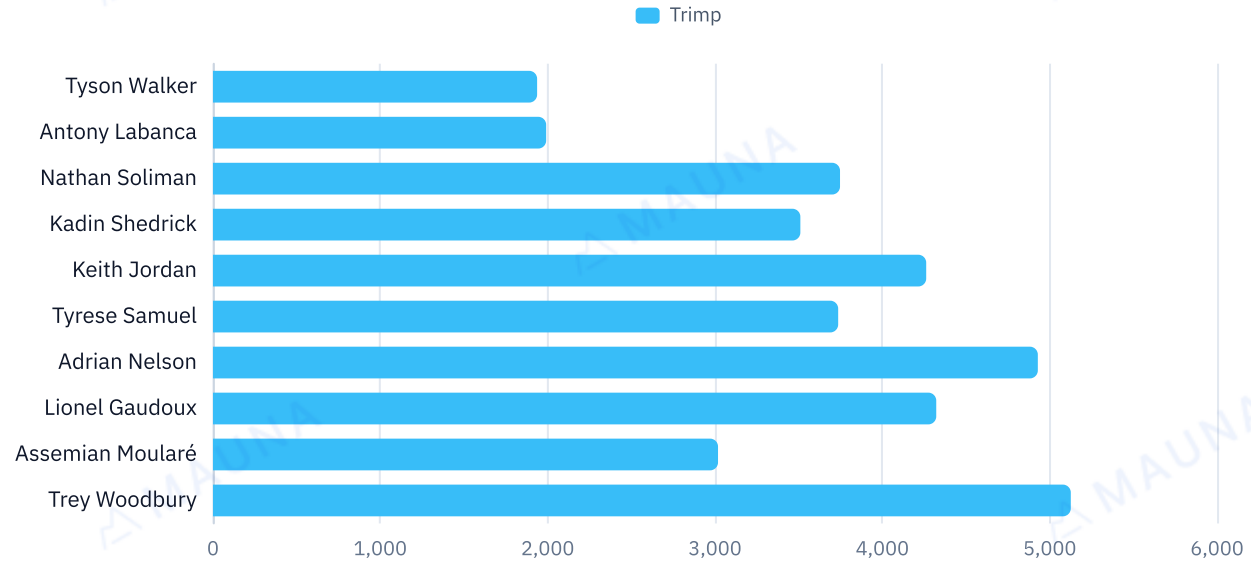

RMSSD — team mean

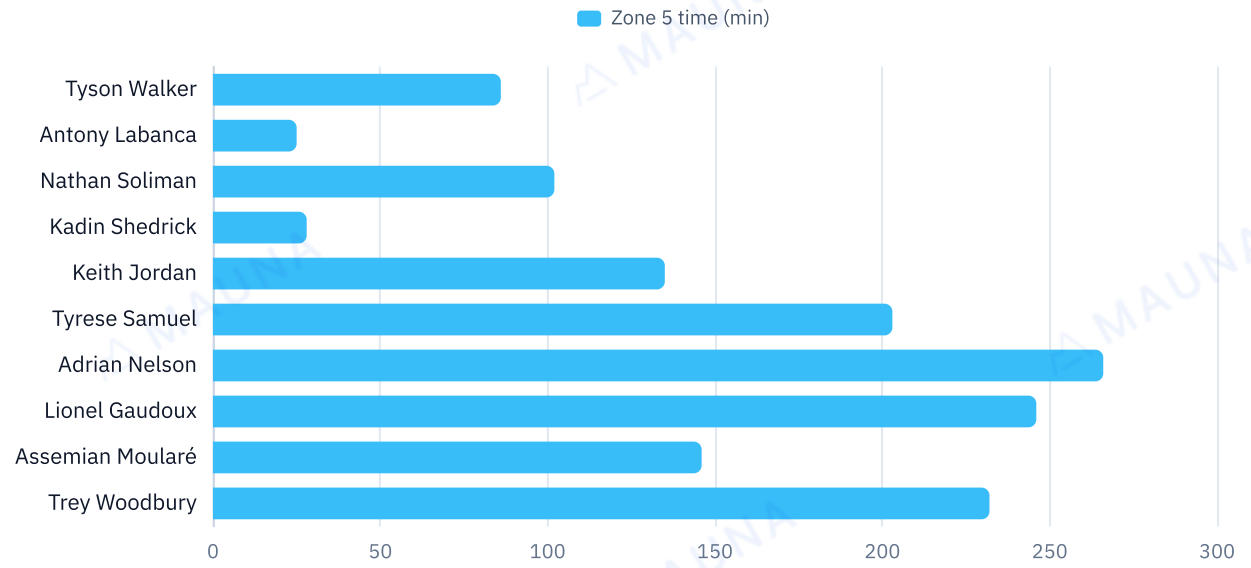

Movement Load total — Top 10

TRIMP total — Top 10

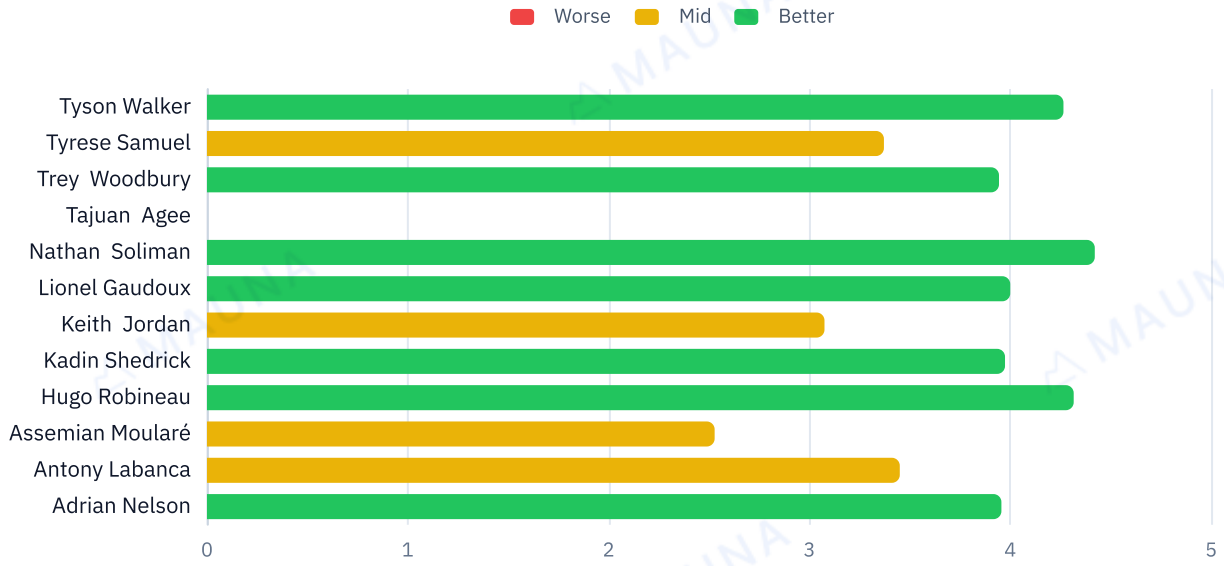

Zone 5 time total — Top 10

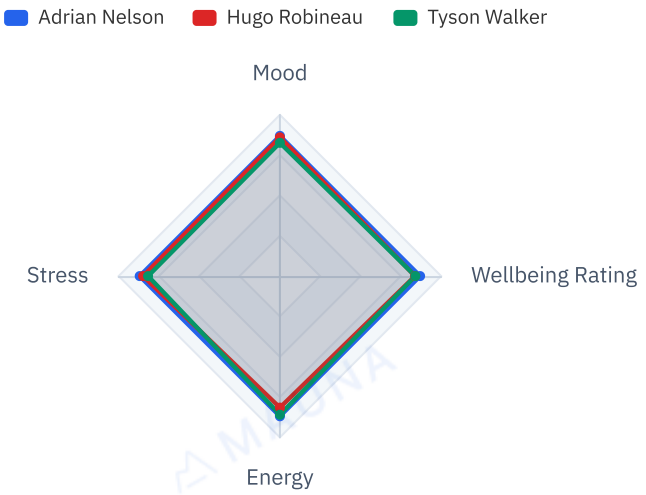

Wellness data (mood, stress, energy, soreness, wellbeing) aggregated across the squad reveals subjective readiness patterns; sleep quality averages provide insight into recovery habits. All wellness scales range from 1 to 5, with lower values indicating better status.

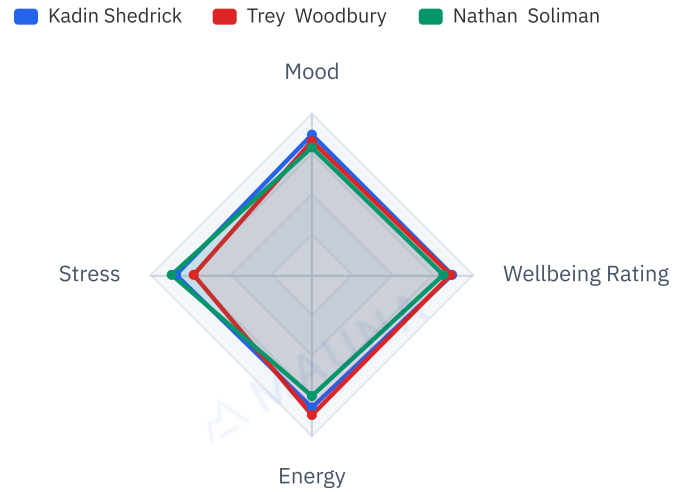

Sleep quality — squad averages

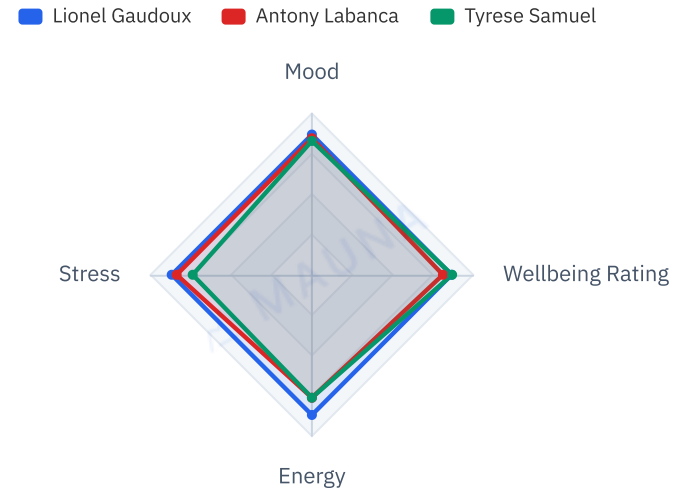

Wellness profile — squad averages (1/4)

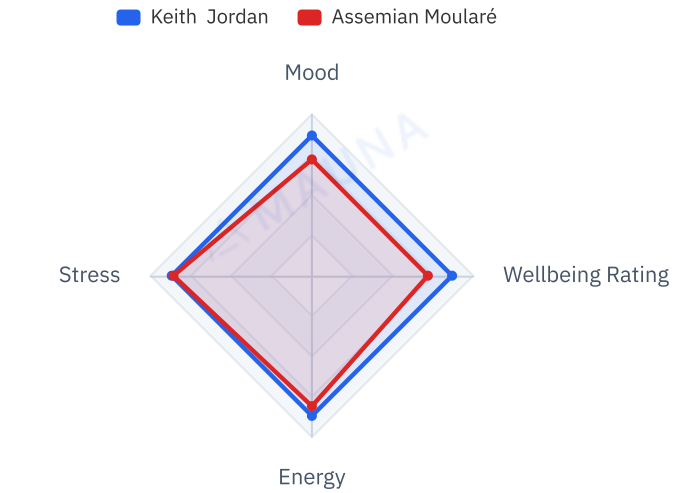

Wellness profile — squad averages (2/4)

Wellness profile — squad averages (3/4)

Wellness profile — squad averages (4/4)

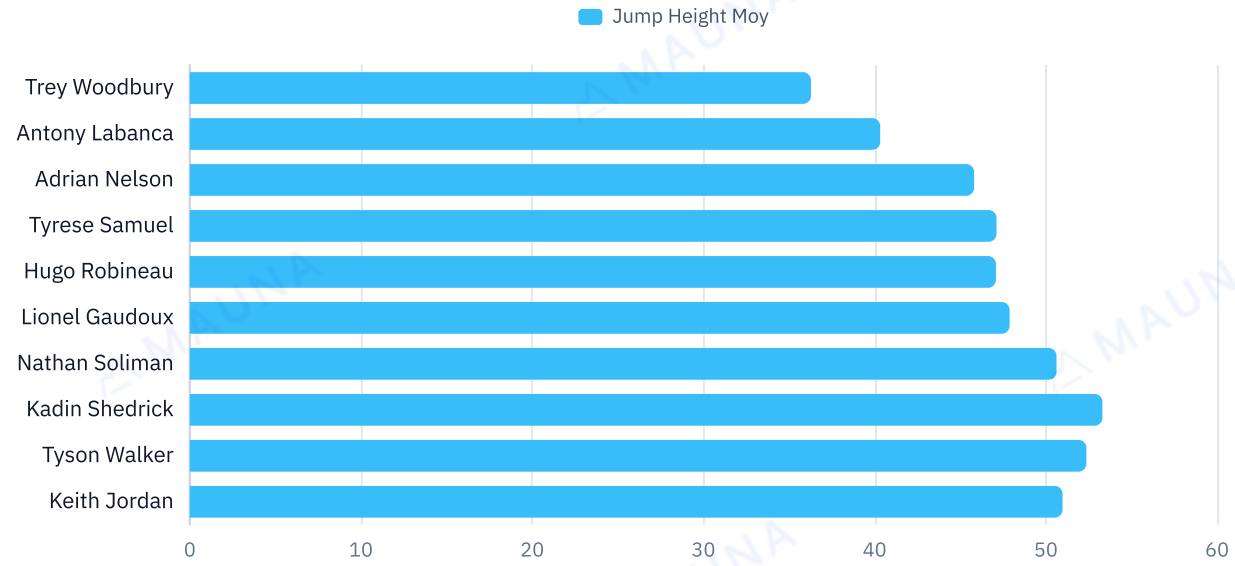

Neuromuscular Performance (VALD)

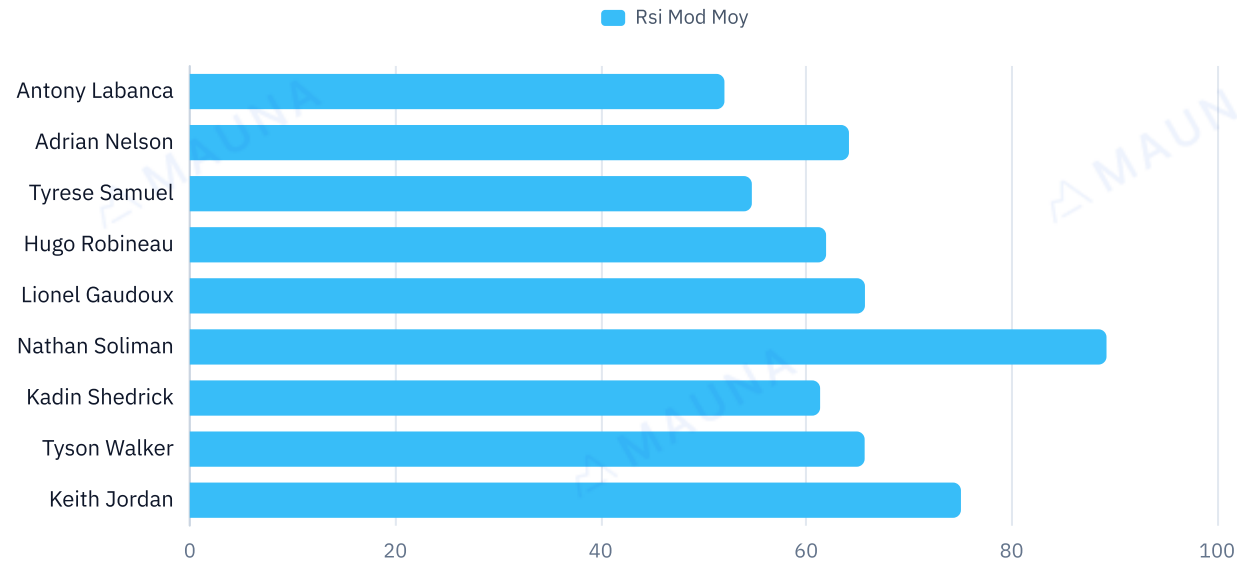

OBJECTIVE BENCHMARKS

Neuromuscular testing (CMJ jump height, DJ RSI mod) offers objective performance benchmarks across multiple test types throughout the season. VALD jump metrics provide neuromuscular benchmarks; track trends for fatigue or performance gains.

CMJ jump height — squad averages

DJ RSI mod — squad averages

Body Composition

LATEST MEASUREMENTS

Weight measurements for 10 athletes captured across the period. Latest readings provide baseline reference for monitoring body composition trends.

Body composition — latest measurements

PLAYER	DATE	POIDS KG
Tyrese Samuel	2026-08-31	113.5
Lionel Gaudoux	2026-08-31	103.4
Kadin Shedrick	2026-08-31	103.3
Keith Jordan	2026-08-31	98.6
Adrian Nelson	2026-08-31	98.5
Nathan Soliman	2026-09-08	96.9
Trey Woodbury	2026-08-31	96.4
Hugo Robineau	2026-08-31	91.9
Antony Labanca	2026-08-20	91
Tyson Walker	2026-08-20	83.3

10 clinical injury events documented with dates, status, pathology, and context. Ongoing cases require close monitoring for safe return-to-play progression. Two athletes currently have ongoing injuries requiring attention.

Injury log — season overview

PLAYER	DATE OF INJURY	RECOVERY DATE	STATUS	INJURY	CONTEXT
Tyson Walker	2026-10-03	—	ongoing	LMA Grade 2, ischio droit	match
Tyson Walker	2026-09-19	2026-09-28	recovered	Béquille Quadriceps Gauche	match
Hugo Robineau	2026-09-11	—	ongoing	LMA carré plantaire Gauche grade 2	training
Nathan Soliman	2026-09-04	2026-09-08	recovered	Suspicion arrachement osseux annulaire gauche	match
Hugo Robineau	2026-09-01	2026-09-03	recovered	Hydarthrose genou gauche sans mécanisme lésionel	training
Trey Woodbury	2026-09-01	2026-09-04	recovered	Lumbago aigue	training
Tyson Walker	2026-08-29	2026-09-09	recovered	Suspicion LMA ischios droit	match
Antony Labanca	2026-08-22	2026-09-16	recovered	LMA du pectiné Gauche, Grade 2	training
Assemian Moularé	2026-07-05	2026-08-30	recovered	Rupture partielle du long abducteur de l'hallux droit	match
Adrian Nelson	2025-07-23	2026-08-17	recovered	Anterior Cruciate Ligament (ACL) Tear	—
