Performance and injury risk score trends with individual player analysis, wellness monitoring, and biomarker review for 1–14 March 2026.

NARRATIVE THREAD

- Team performance score averaged 48.6 over the period, with peaks on 1 March (54.8) and 7 March (55.4). Team injury risk score averaged 7.5, peaking at 10.3 on 1 March.
- GPS data shows match day 11 March as the highest-intensity session: team mean total distance 6,962 m, HMLD 1,217 m, HSR 384 m, explosive distance 833 m.
- Performance declines: Robert Glatzel (−14.7% vs baseline) and Nicolás Capaldo (−8.1%). Glatzel's decline correlates with post-match fatigue (11 March spike: 7,761 m total distance, 1,299 m HMLD). Capaldo shows sparse GPS data (only 3 sessions) and rising soreness (15→29).

SIGNALS

REVIEW Robert Glatzel: performance score declined −14.7% vs baseline (51→43). Post-match fatigue likely (11 March spike: 7,761 m total distance, 1,299 m HMLD). Body soreness stable (25–28).
Robert Glatzel · performance · gps · wellness

REVIEW Nicolás Capaldo: performance score declined −8.1% vs baseline (53→60). Sparse GPS data (3 sessions, low HMLD 43–232 m). Body soreness increased (15→29). Reduced training exposure may contribute.
Nicolás Capaldo · performance · gps · wellness

INFO Yussuf Poulsen: performance score increased +26.5% vs baseline (50→65). Sustained moderate-to-high intensity training (HMLD 171–627 m, explosive distance 122–513 m). Low, stable soreness (20–25).
Yussuf Poulsen · performance · gps · wellness

WATCH Albert Sambi Lokonga: injury risk score increased +115.4% vs baseline (0→2). Match-day spike (11 March: 1,304 m HMLD, 951 m explosive distance). Body soreness increased (18–19→21–25).
Albert Sambi Lokonga · injury_risk · gps · wellness

WATCH Damion Downs: injury risk score increased +115.4% vs baseline (0→2). Match-day spike (11 March: 1,161 m HMLD, 799 m explosive distance). Body soreness consistently elevated (31–40).
Damion Downs · injury_risk · gps · wellness

INFO Albert Grønbæk: injury risk score decreased −100% vs baseline (3→0). Low and declining soreness (10–16) despite high training loads (11 March: 1,613 m HMLD, 1,185 m explosive distance).
Albert Grønbæk · injury_risk · gps · wellness

WATCH Bakery Jatta, Damion Downs, Fabio Baldé: highest body soreness averages (38.5, 35.1, 33.2). Monitor for fatigue accumulation.

TEAM MEAN MOOD

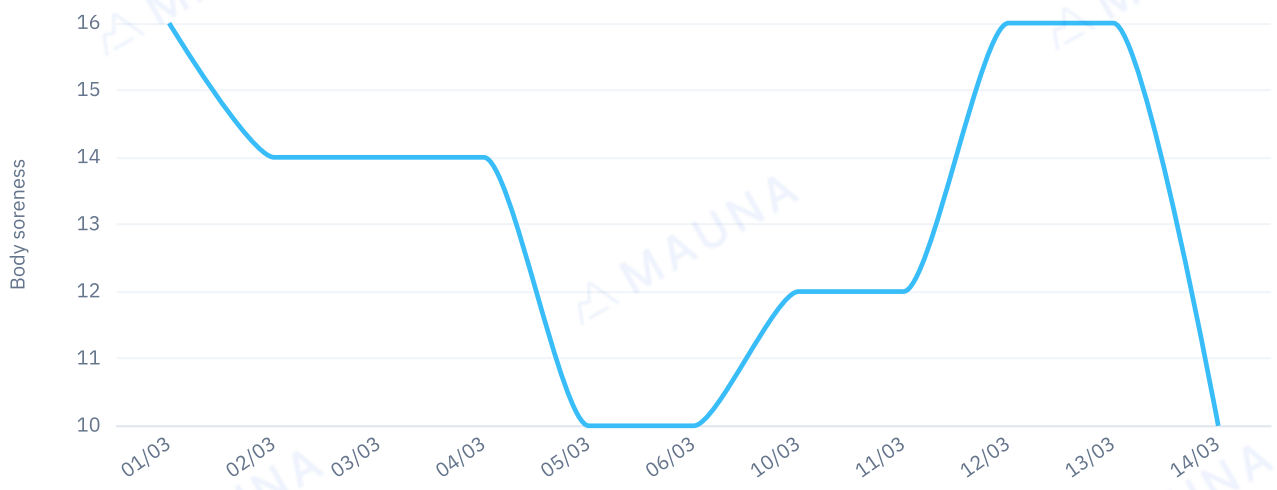

TEAM MEAN BODY SORENESS

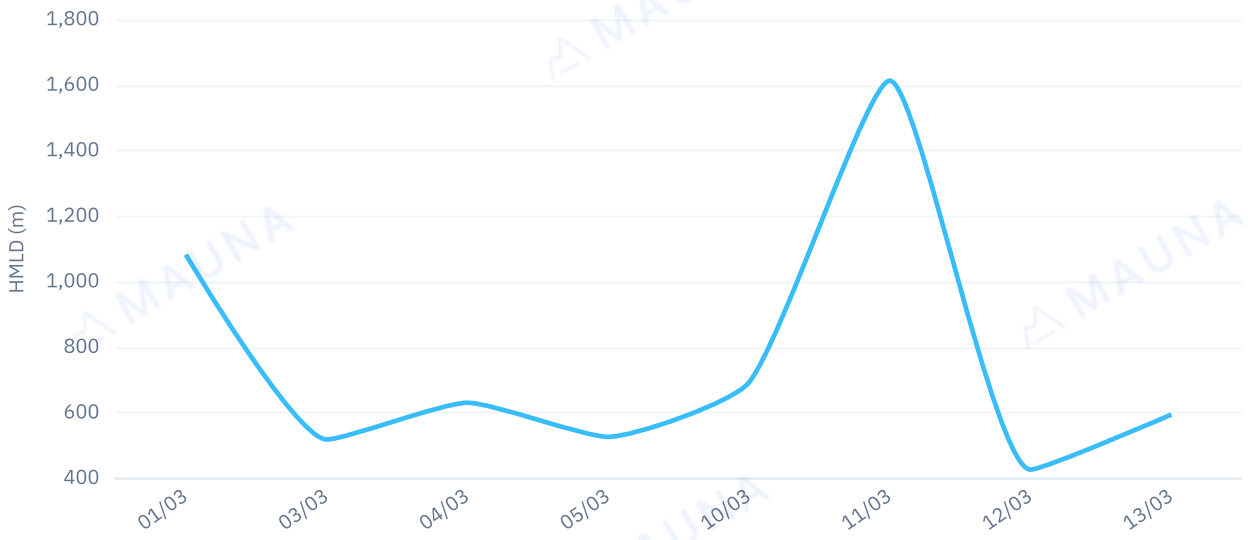

- Grønbæk's injury risk score declined from 3 (1 March) to 0 (14 March), −100% vs baseline. Match day 11 March shows a spike in HMLD (1,613 m) and explosive distance (1,185 m). Body soreness remained low (10–16) and decreased over the period. The decrease in injury risk correlates with low and declining soreness despite high training loads.

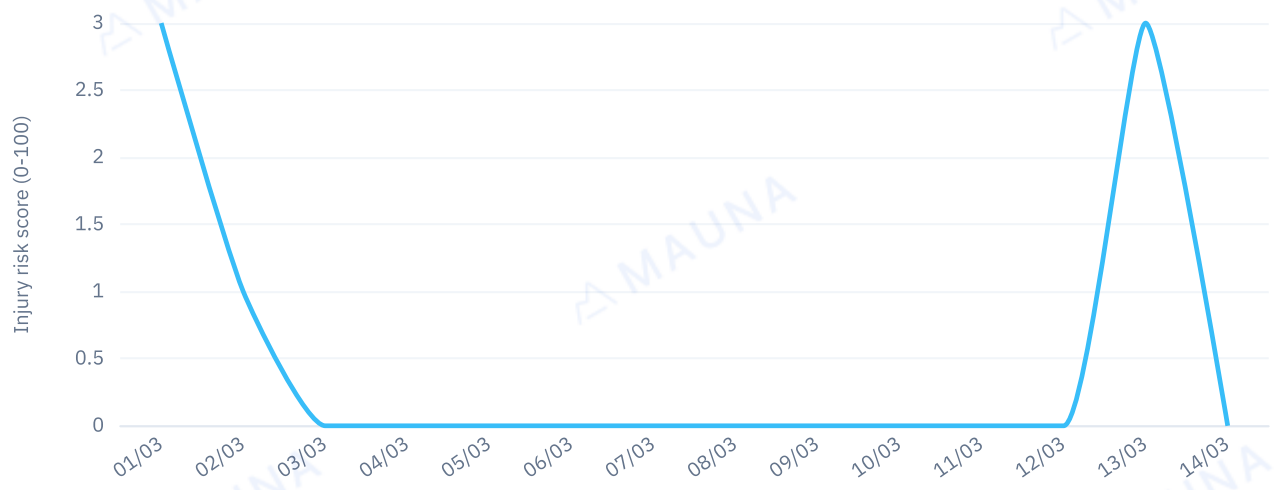

BODY SORENESS – ALBERT GRØNBÆK

HMLD – ALBERT GRØNBÆK

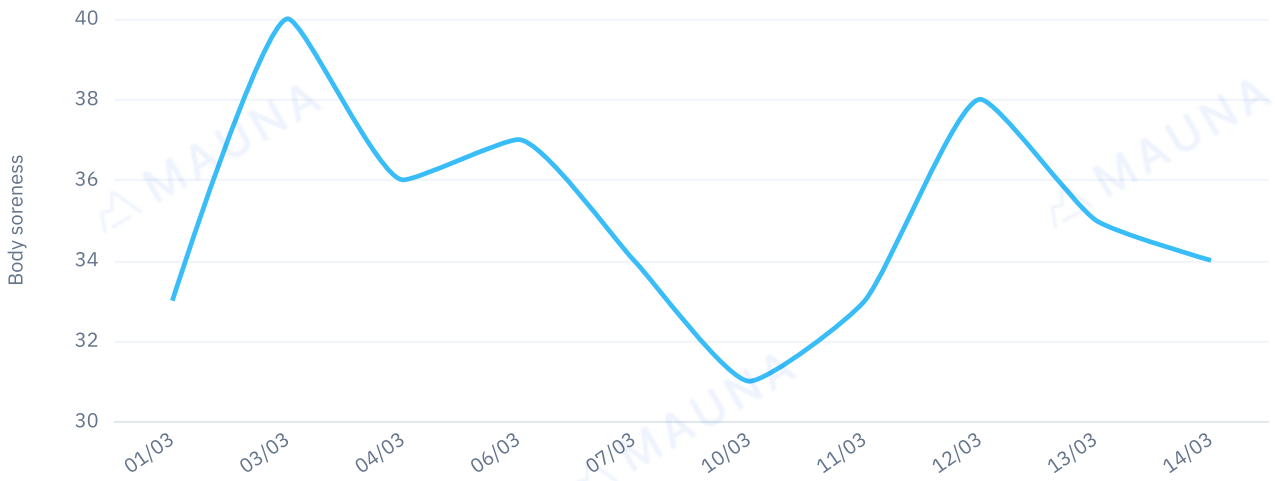

INJURY RISK SCORE

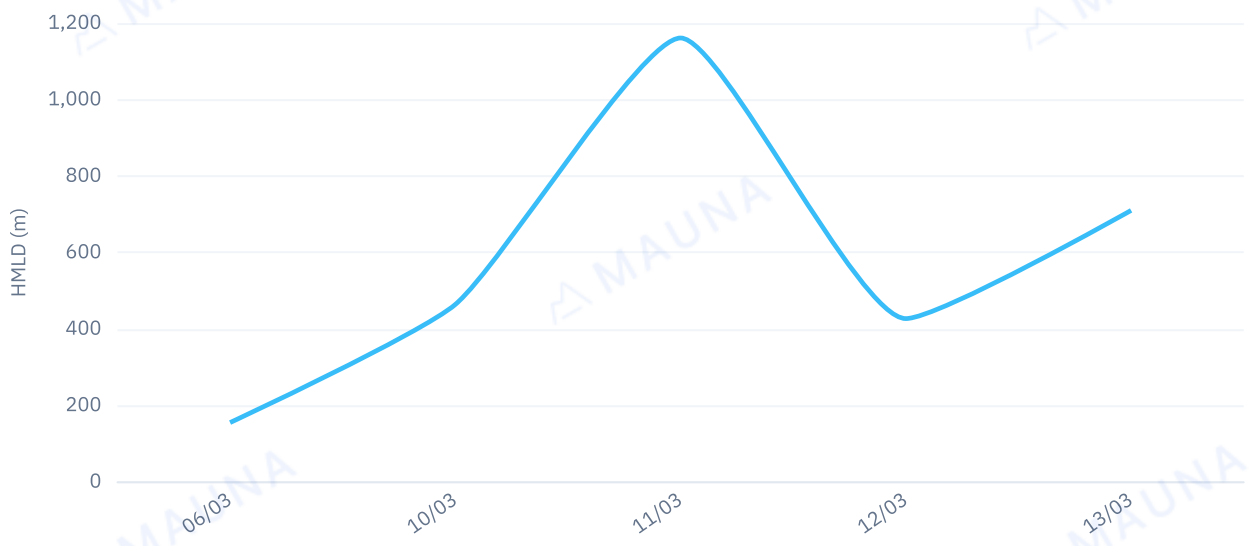

- Downs' injury risk score remained near zero most of the period, rising to 2 on 14 March (+115.4% vs baseline). Match day 11 March shows a spike in HMLD (1,161 m) and explosive distance (799 m). Body soreness remained elevated (31–40) throughout. The modest increase in injury risk may reflect cumulative load and consistently high soreness.

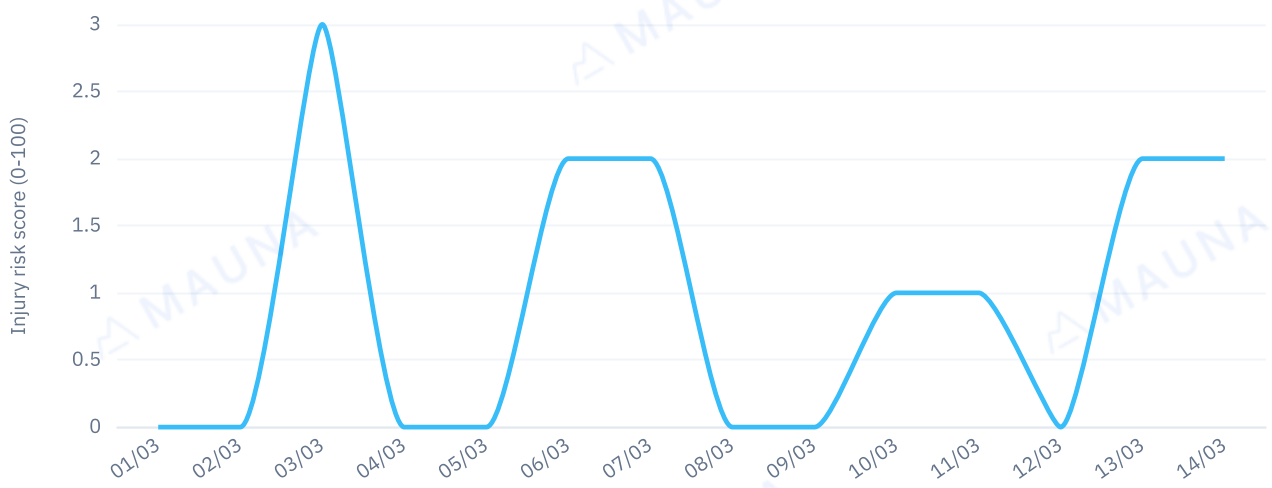

BODY SORENESS – DAMION DOWNS

HMLD – DAMION DOWNS

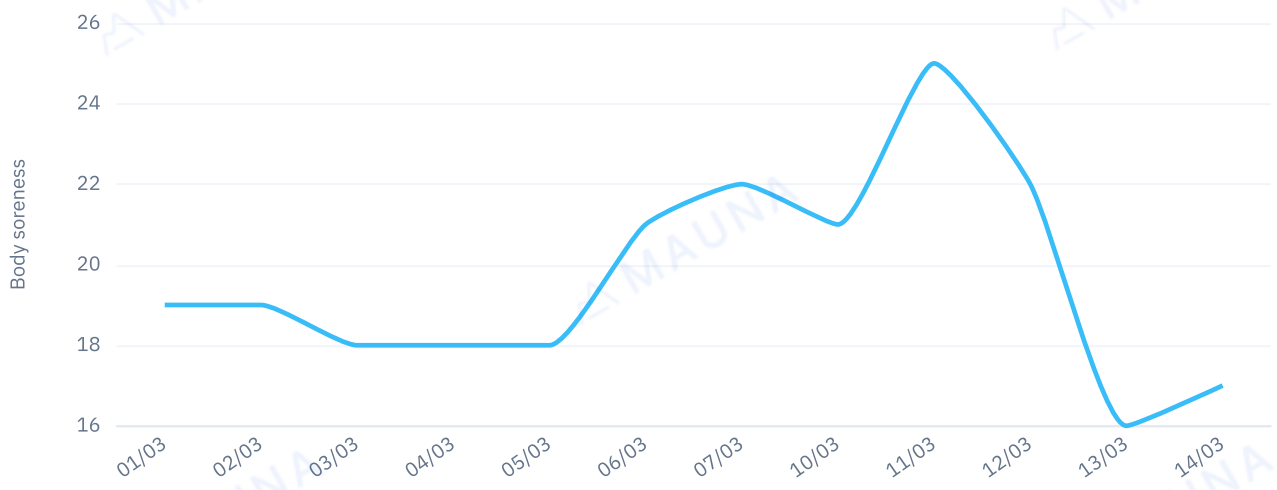

INJURY RISK SCORE

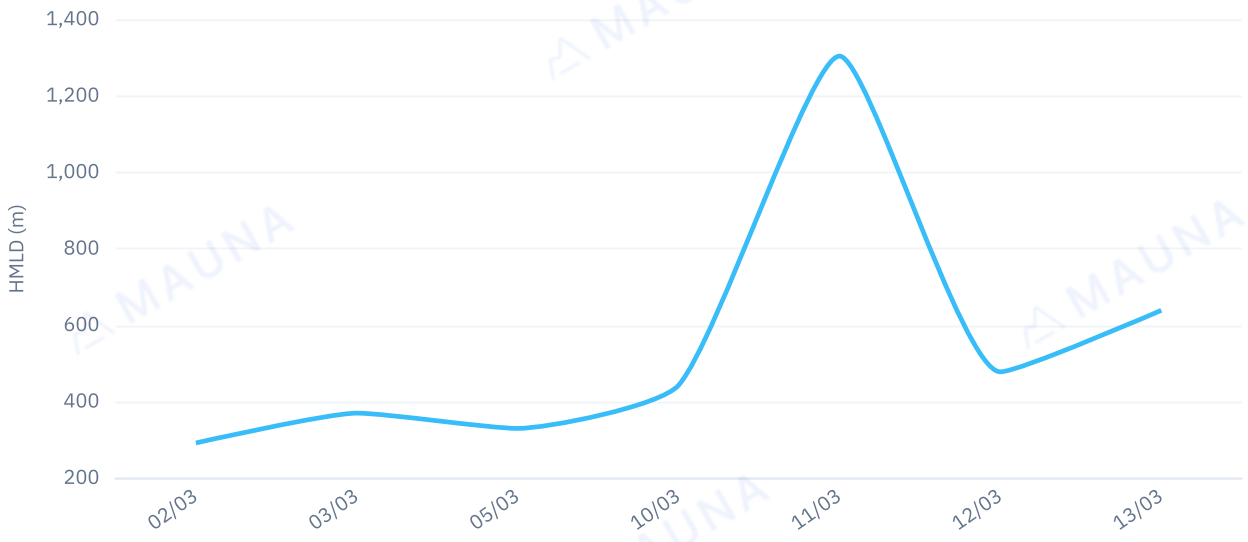

- Sambi Lokonga's injury risk score remained near zero most of the period, rising to 2 on 14 March (+115.4% vs baseline). Match day 11 March shows a spike in HMLD (1,304 m) and explosive distance (951 m). Body soreness increased from 18–19 (early period) to 21–25 (late period). The modest increase in injury risk may reflect cumulative load and rising soreness post-match.

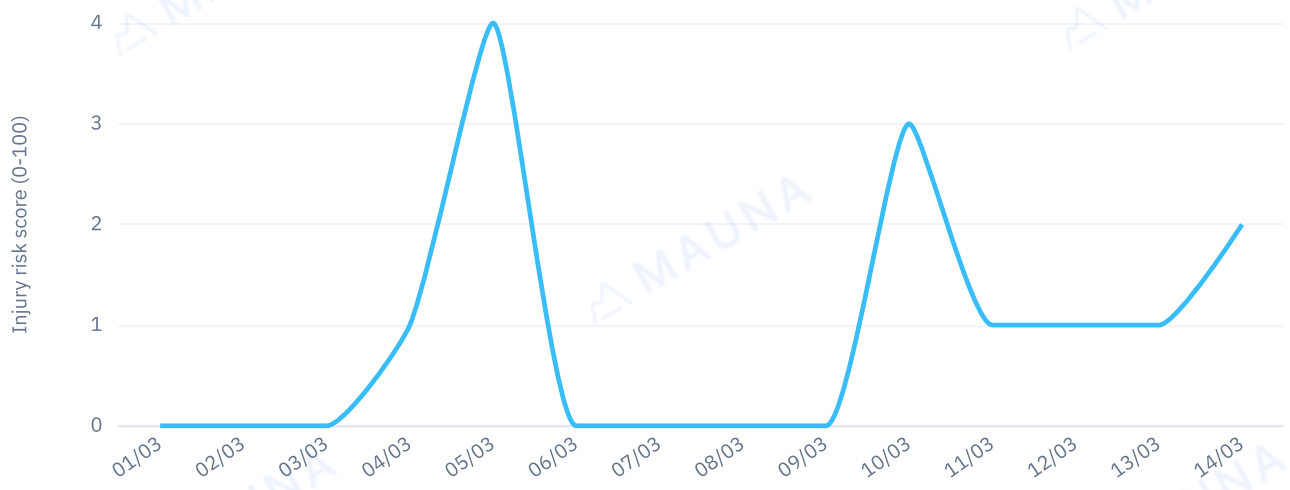

BODY SORENESS – ALBERT SAMBI LOKONGA

HMLD – ALBERT SAMBI LOKONGA

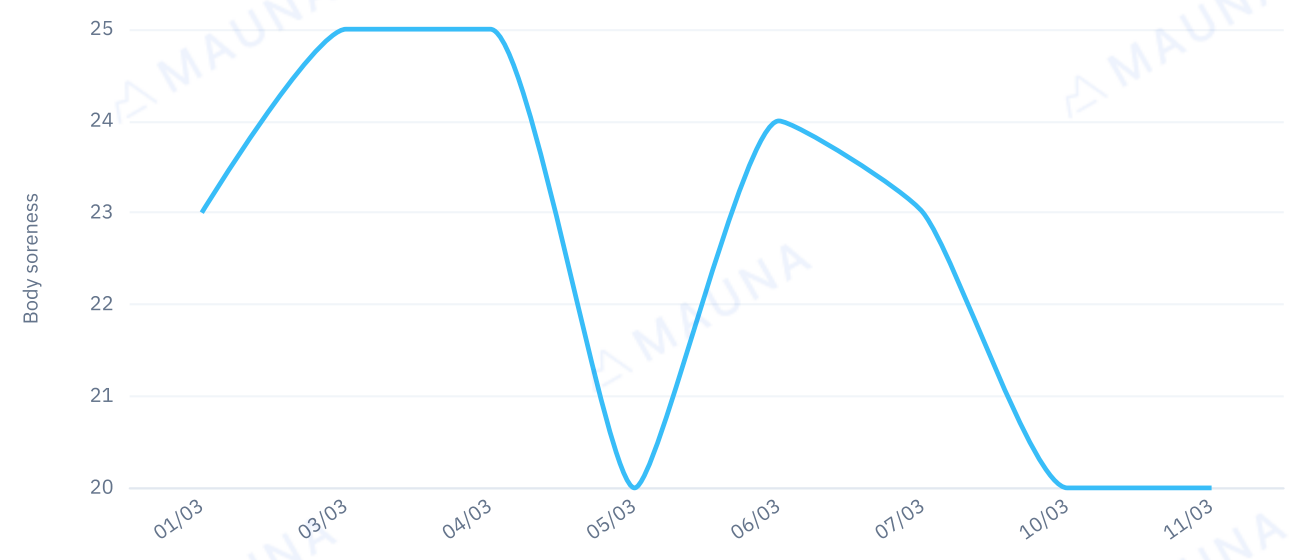

INJURY RISK SCORE

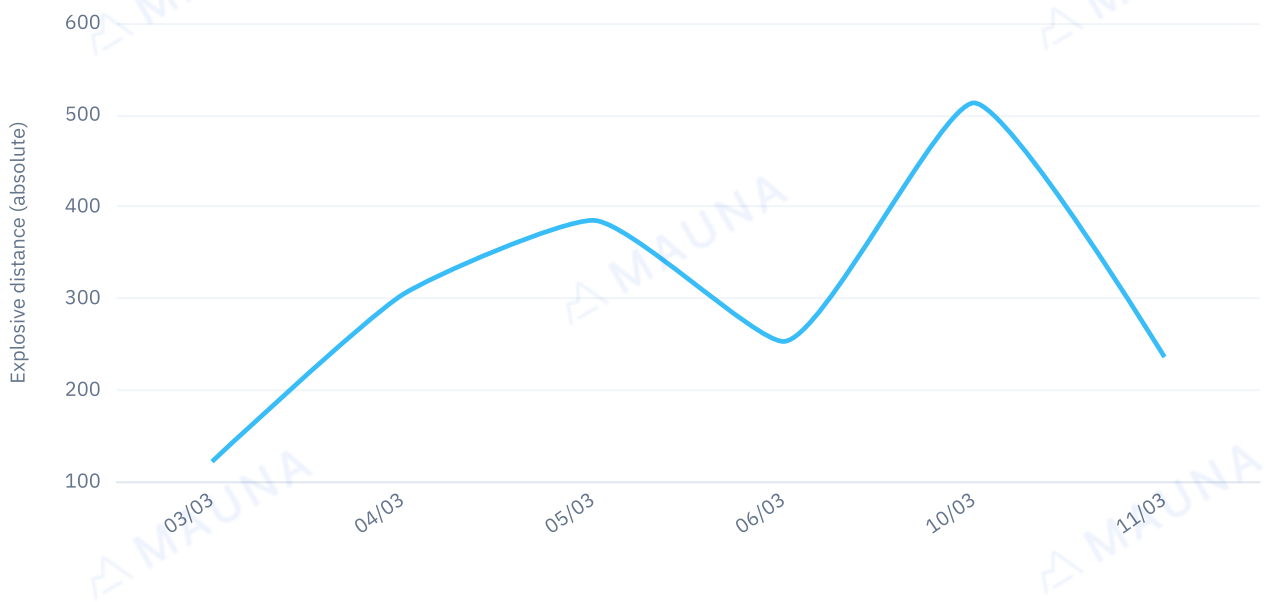

- Team injury risk score averaged 7.5 over the period, peaking at 10.3 on 1 March. Two players show notable increases: Albert Sambi Lokonga and Damion Downs (both +115.4% vs baseline, reaching 2 on 14 March). One player shows a marked decrease: Albert Grønbæk (−100%, 0 on 14 March).
- Poulsen's performance score rose from 50 (1 March) to 65 (13 March), +26.5% vs baseline. GPS shows consistent HMLD (171–627 m) and explosive distance (122–513 m) across 6 sessions. Body soreness remained low and stable (20–25). The increase correlates with sustained moderate-to-high intensity training without wellness deterioration.

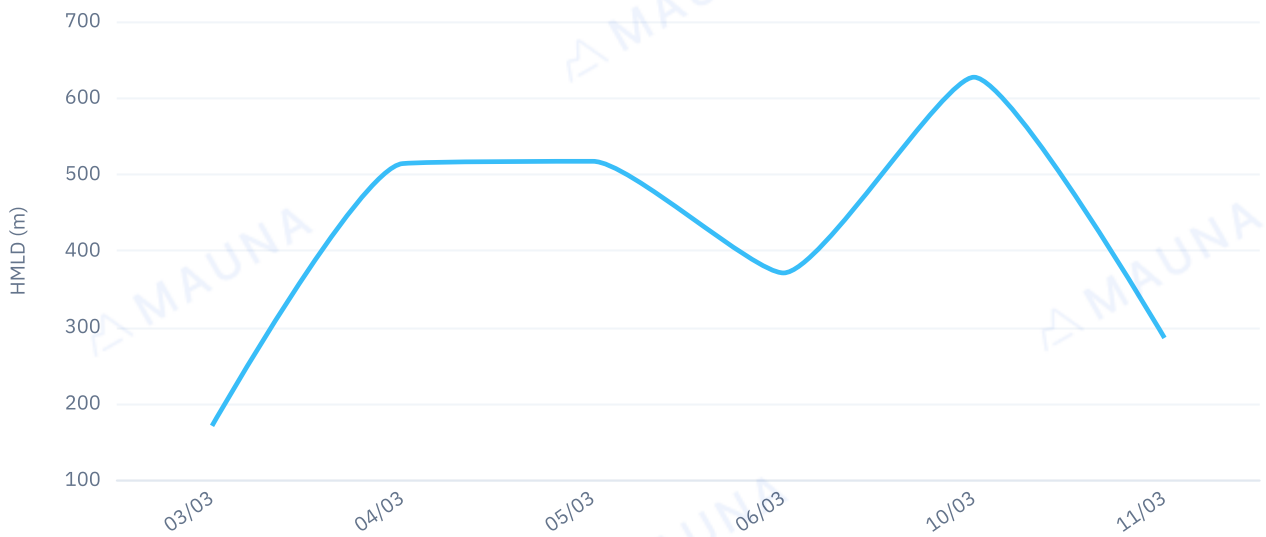

BODY SORENESS – YUSSUF POULSEN

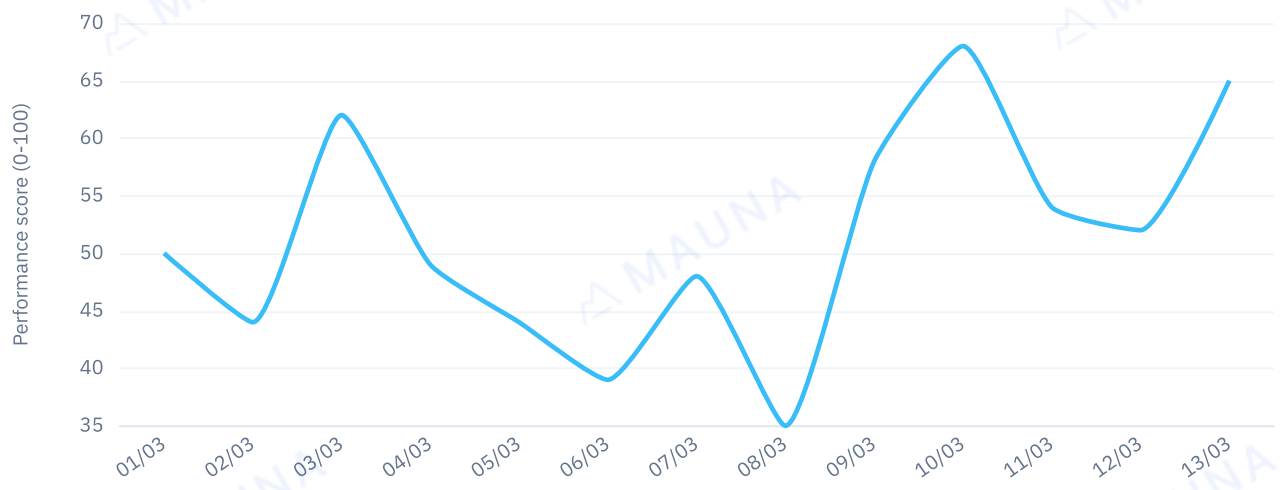

EXPLOSIVE DISTANCE – YUSSUF POULSEN

HMLD – YUSSUF POULSEN

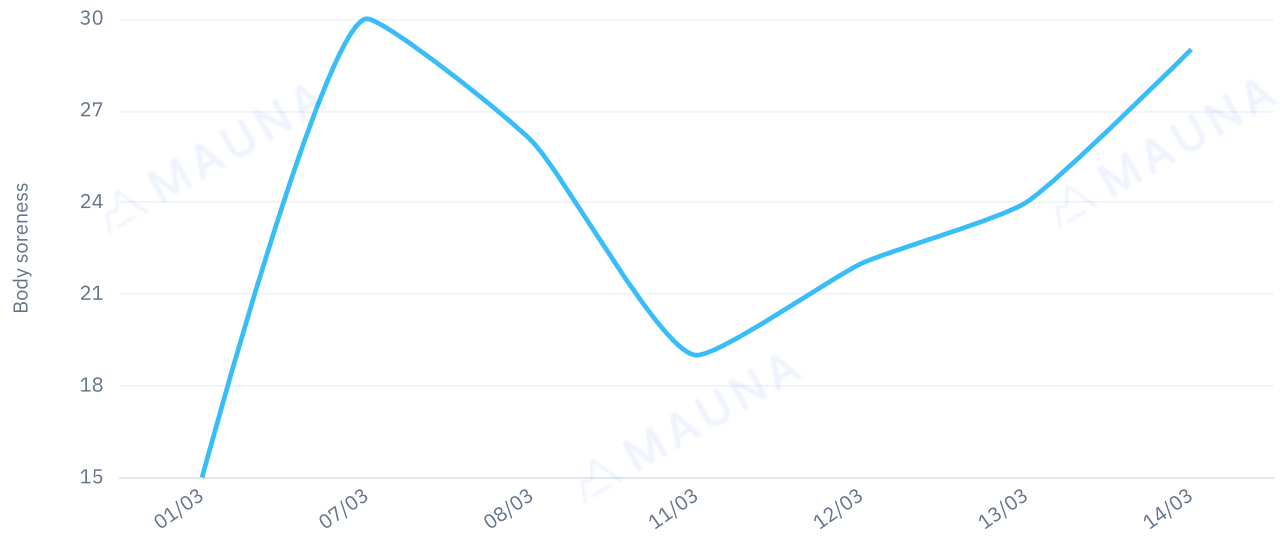

PERFORMANCE SCORE

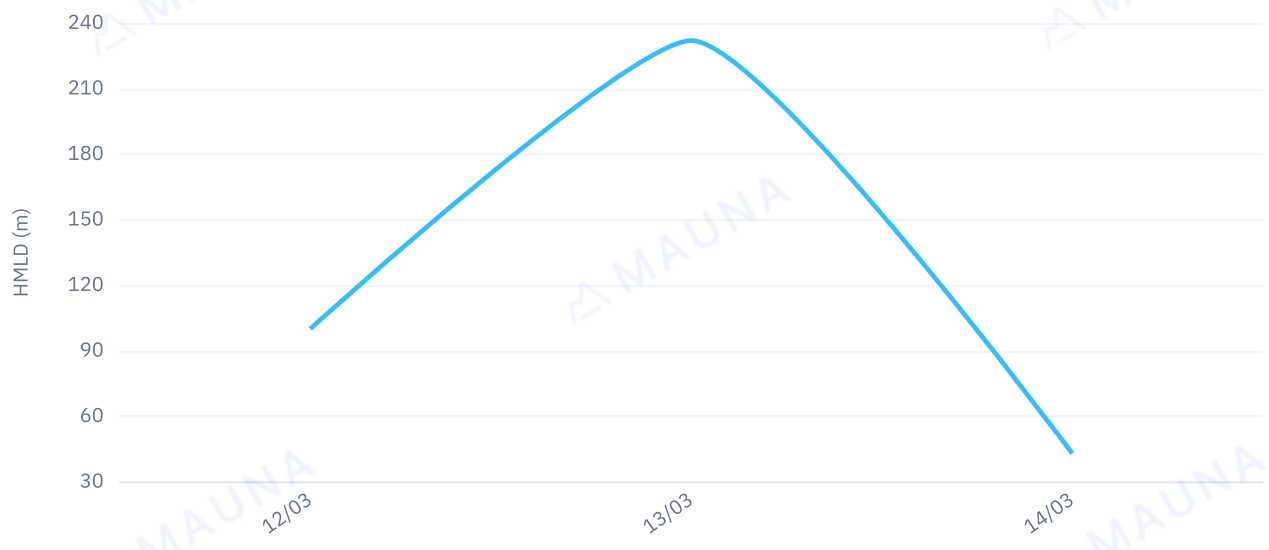

- Capaldo's performance score rose from 53 (1 March) to 72 (8 March), then declined to 60 (14 March), −8.1% vs baseline. GPS data sparse: only 3 sessions (12–14 March) show very low HMLD (43–232 m). Body soreness increased from 15 to 29 over the period. Mood spiked to 38 on 14 March. The decline may reflect reduced training exposure and rising soreness rather than external load.

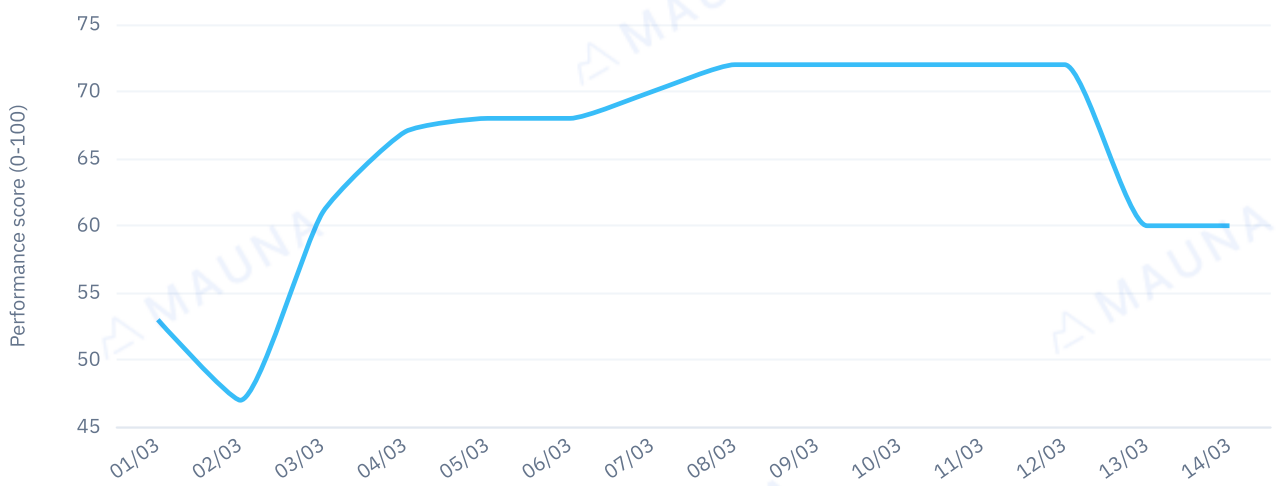

BODY SORENESS – NICOLÁS CAPALDO

HMLD – NICOLÁS CAPALDO

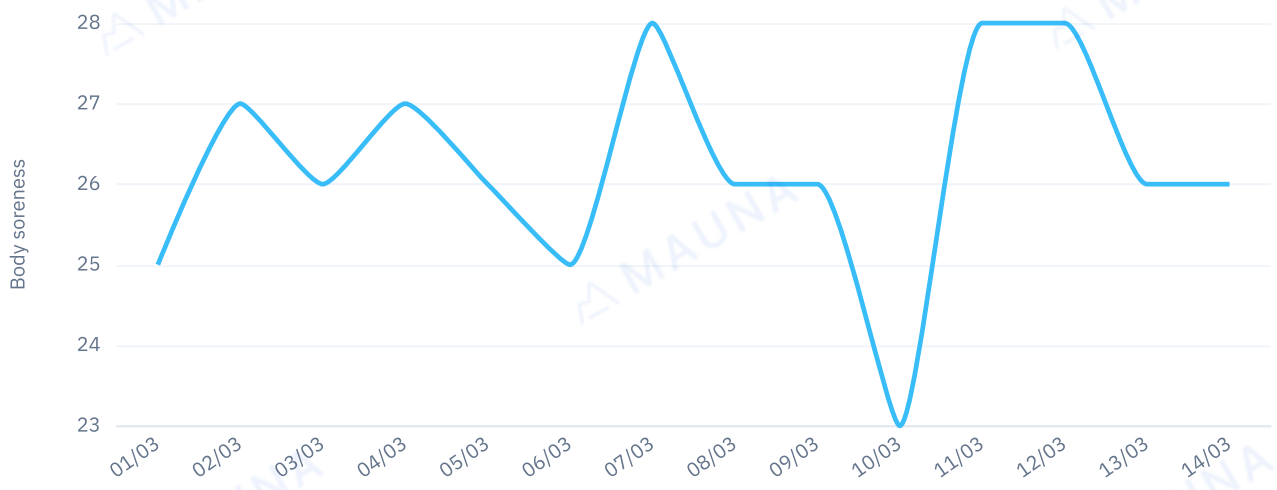

PERFORMANCE SCORE

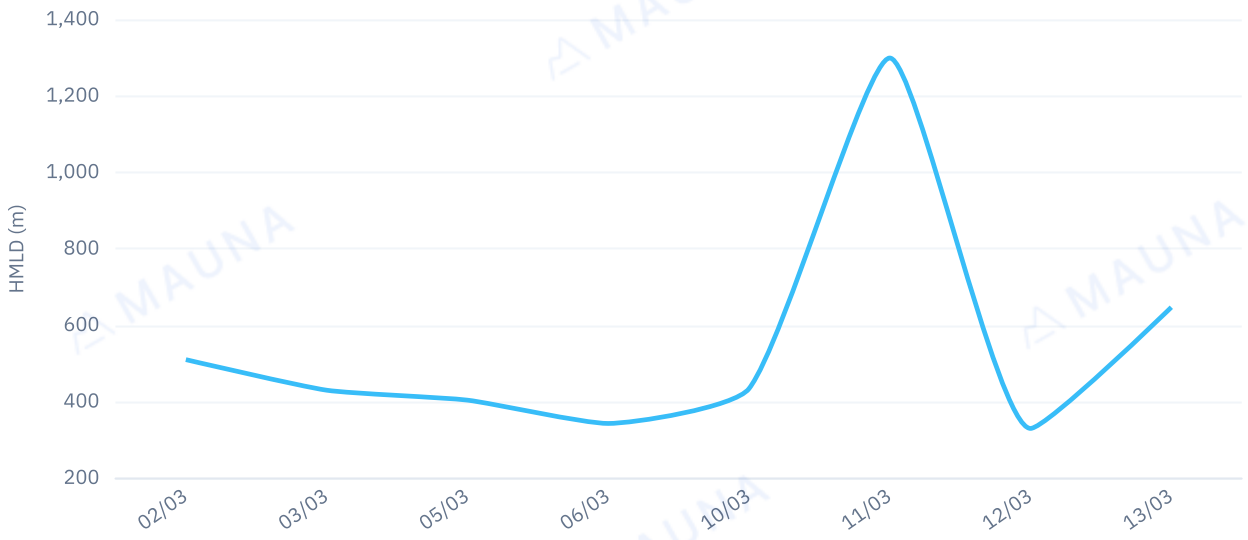

- Glatzel's performance score declined from 51 (1 March) to 43 (14 March), −14.7% vs baseline. Match day 11 March shows a spike in total distance (7,761 m) and HMLD (1,299 m), followed by lower volumes. Body soreness remained stable (25–28). Correlation performance vs injury risk: r=0.36 (weak positive). The decline may reflect post-match fatigue and reduced training intensity rather than wellness deterioration.

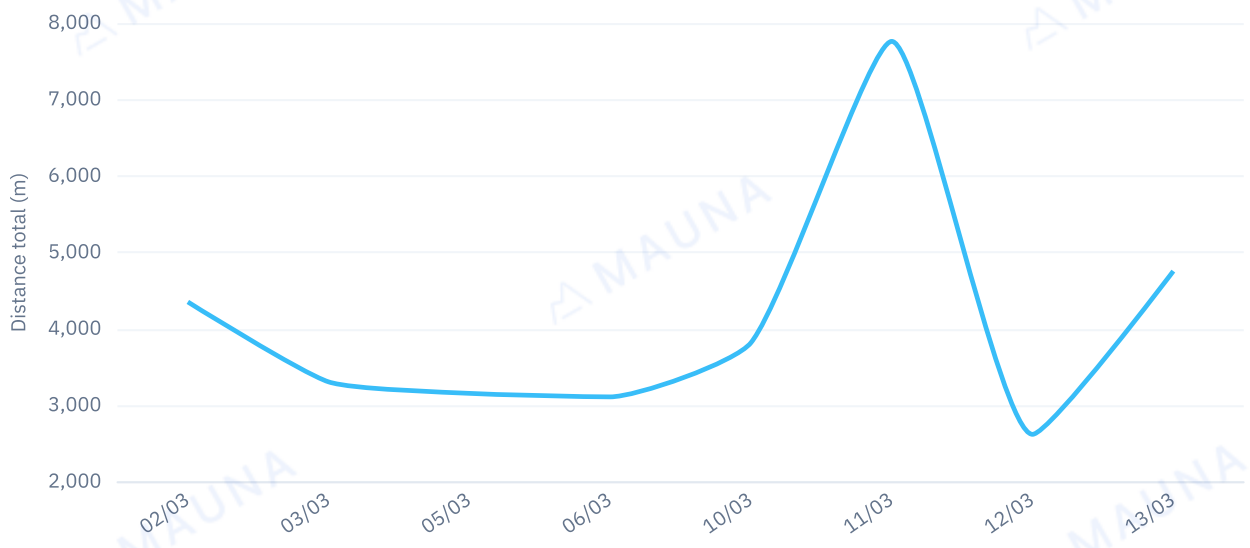

BODY SORENESS – ROBERT GLATZEL

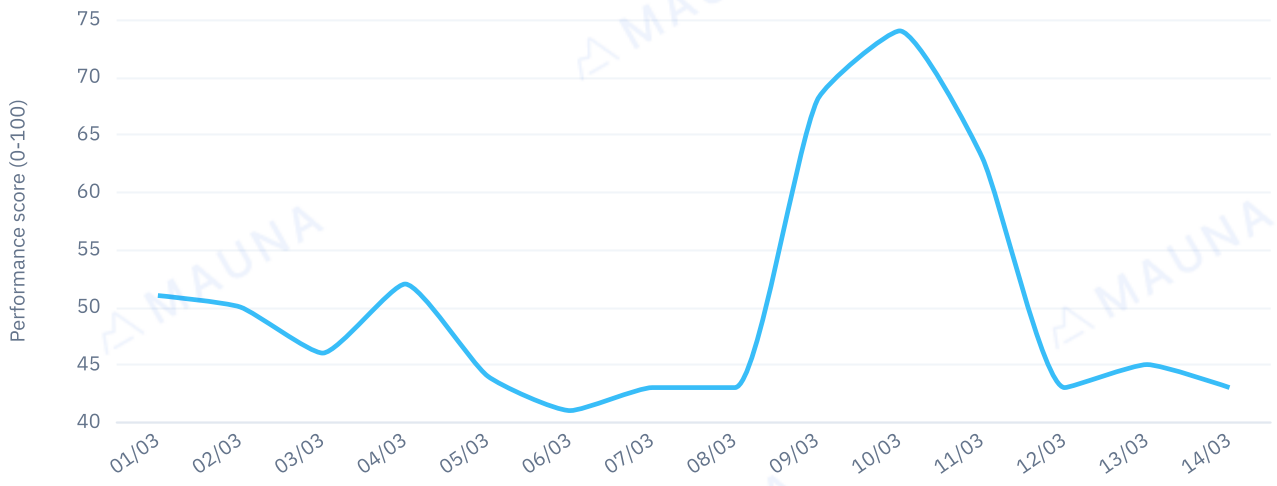

HMLD – ROBERT GLATZEL

TOTAL DISTANCE – ROBERT GLATZEL

PERFORMANCE SCORE

- Team performance score averaged 48.6 over the period, with peaks on 1 March (54.8) and 7 March (55.4). Two players show notable declines: Robert Glatzel (−14.7% vs baseline) and Nicolás Capaldo (−8.1%). One player shows a marked increase: Yussuf Poulsen (+26.5%).
