06 · 2. Team Performance Scores & Influencing Factors §4

STAFF READ

2026-03-15 → 2026-03-22

Change of direction intensity (accelerations/decelerations), performance scores, wellness/sleep recovery indicators, and GPS distance metrics during March 15–22, with enriched color-coded table design.

NARRATIVE THREAD

- The coach requested enhanced table design with color coding and a focused analysis of change-of-direction metrics for March 15–22.
- Training load summary table features gradient heat colors across EWMA-7, daily sRPE, monotony, strain, and ACWR to highlight volume and risk zones.
- Change-of-direction analysis reveals relative accelerations and decelerations per minute, plus high-intensity zone 6 events, providing insight into neuromuscular demand across the squad.

SIGNALS

REVIEW — Several athletes show elevated monotony (>2.0) and strain (>1500 AU) in the load summary table, indicating repetitive training patterns that may warrant variation in session design.

load

WATCH — High-intensity change-of-direction metrics (zone 6 accelerations/decelerations) vary widely across the squad, with some players accumulating notably higher neuromuscular loads (e.g., >5 events/min).

gps

INFO — Performance score range chart highlights athletes with larger min–max spreads (>20 points), suggesting day-to-day readiness fluctuations that may correlate with wellness or sleep quality.

scores · wellness

INFO — Correlation analysis reveals weak relationships between performance scores and wellness indicators (soreness, mood, sleep quality), indicating that readiness is likely influenced by multiple factors beyond subjective wellness.

scores · wellness · sleep

WATCH — Body soreness evolution charts show fluctuating patterns across groups, with some athletes reporting elevated soreness (>35/50) on multiple days during the display week.

wellness

INFO — GPS distance summary reveals wide variation in cumulative total distance (13,633–30,707 m) and HMLD (1,718–4,485 m), reflecting different session participation or positional demands.
