Performance & Injury Risk Scores

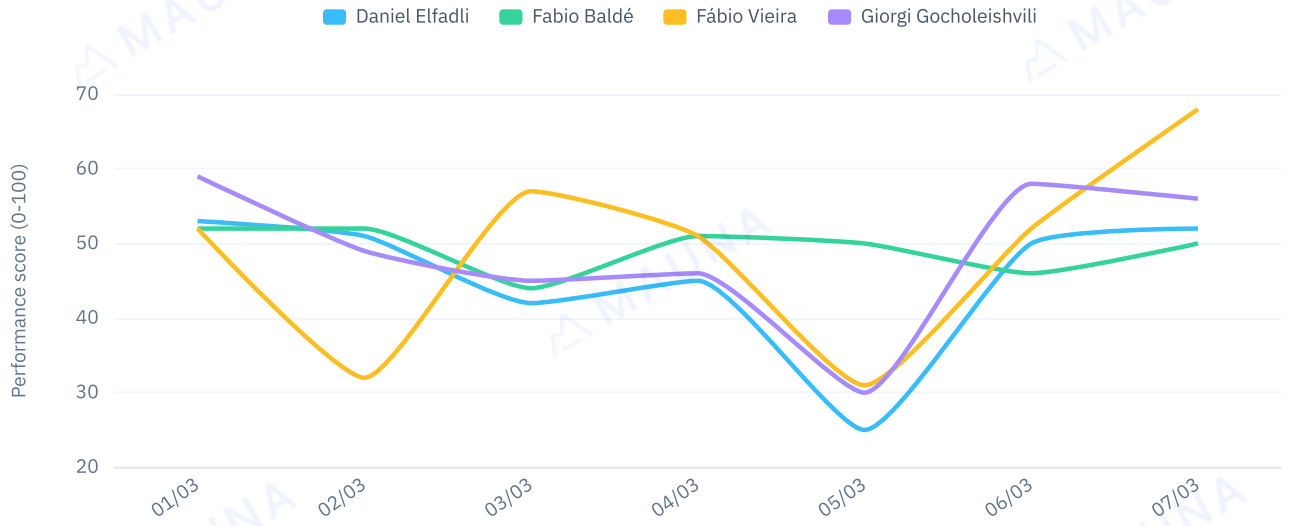

1–7 March

Performance scores averaged 49.7 (range 25–72) across the week, with the lowest team mean on 2 March (42.7) and highest on 7 March (55.4). Injury risk remained low overall (mean 7.6, range 0–70), but three athletes showed elevated scores: Yussuf Poulsen (68 on 7 March), Robert Glatzel (17), and Bakery Jatta (11, down from 67 early in the week).

External Load by Position

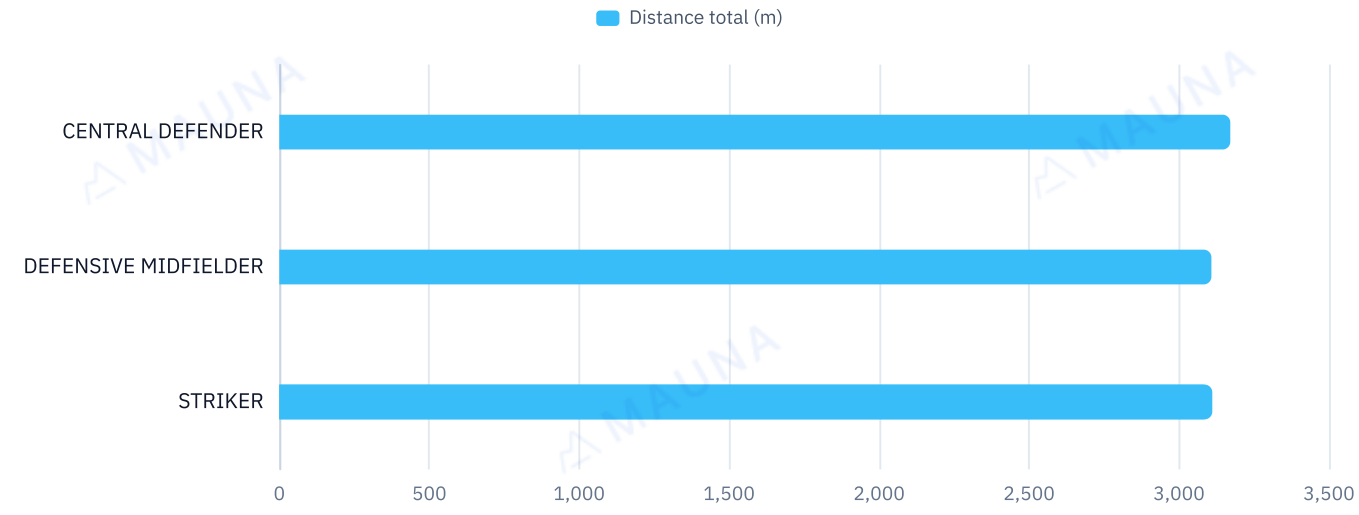

Comparison

External load varied by position: Attacking Midfielders led in total distance (3294 m) and HMLD (593 m), while Defensive Midfielders showed lower volumes (1761 m, 215 m HMLD). Wingers and Full Backs recorded the highest high-speed running (140 m, 128 m) and explosive distance (271 m, 241 m). Central Defenders and Strikers showed moderate metrics across all categories.

Subjective Wellness

25 Feb – 7 Mar

Wellness averages (25 Feb–7 Mar) show body soreness ranging from 13.7 to 37.6 (scale 10–60, higher is worse), mood from 10 to 34.3, and sleep quality from 10 to 40 (scale 10–60, higher is worse). The data suggests moderate variability across the squad. Note: Radar chart not feasible with fewer than four same-scale axes; table provided instead.

Wellness averages (25 Feb – 7 Mar)

PLAYER	BODY SORENESS	MOOD	SLEEP QUALITY
Albert Grønbæk	13.7	10	10
Albert Sambi Lokonga	20.27	17	23
Bakery Jatta	37.63	34.25	33

Nutrition

Energy drink

Monster Energy Drink – Typical Composition (per 500 ml can)

Energy: ~240 kcal (1005 kJ) | **Carbohydrates:** ~54 g (sugars ~54 g) | **Caffeine:** ~160 mg | **Taurine:** ~1000 mg | **B-vitamins:** B2 (Riboflavin), B3 (Niacin), B6, B12 | **Other ingredients:** Carbonated water, citric acid, natural flavors, sodium citrate, color (caramel), sucralose, potassium sorbate, benzoic acid, inositol, L-carnitine, glucuronolactone, guarana extract, ginseng extract.

Note: Composition varies by product variant. High sugar and caffeine content; consider timing and individual tolerance.

Biomarkers – December 2025

Historical

Biomarker data available only for December 2025 (24 measurements, CMJ score). No recent biomarker testing in March 2026. Consider scheduling updated assessments to track current physiological status.

High Injury-Risk Athletes

Individual profiles

Top 5 injury-risk athletes on 7 March: Poulsen (68), Glatzel (17), Jatta (11), Elfadli (9), Dompé (6). Individual profiles below detail score trends, wellness, and load for the three highest-risk athletes.

Top 5 injury-risk athletes (7 March)

PLAYER	PERFORMANCE SCORE (0-100)	INJURY RISK SCORE (0-100)
Yussuf Poulsen	48	68
Robert Glatzel	43	17
Bakery Jatta	72	11
Daniel Elfadli	52	9
Jean-Luc Dompé	47	6

Yussuf Poulsen – Individual Profile

Injury risk elevated and persistent (64–70) throughout the week, peaking 6 March. Performance fluctuated (39–62), lowest on 6 March. Wellness stable (soreness 20–25, mood 20–22). Recent sRPE: 2662. Consider workload management and recovery protocols.

DATE	PERFORMANCE SCORE (0-100)	INJURY RISK SCORE (0-100)
