Individual performance and injury risk evolutions, external load by position, subjective wellness profiles, sleep-mood relationship, and elevated injury risk athlete profiles.

NARRATIVE THREAD

- Performance scores averaged 48/100 across the squad during the week, with daily fluctuations (mean 40–55). Injury risk scores remained low for most athletes (mean 6–10), but three players showed elevated risk.
- Yussuf Poulsen recorded the highest injury risk (mean 64/100, range 49–70) throughout the week, with stable but moderate performance (39–62). Body soreness and mood were consistent.
- Bakery Jatta displayed high injury risk (61–67) through 4 March, then a sharp decline to 11–19 by week's end. Performance improved concurrently (39→72). Early-week soreness was elevated (36–39).

SIGNALS

REVIEW

Yussuf Poulsen: Elevated injury risk score (mean 64/100, range 49–70) throughout 1–7 March. Performance moderate (39–62). Body soreness and mood stable but slightly elevated. Recommend close monitoring and individualized load management.

WATCH

Bakery Jatta: High injury risk (61–67) through 4 March, then sharp drop to 11–19 by week's end. Performance improved (39→72). Early-week body soreness elevated (36–39). Recent downward trend encouraging; continue monitoring wellness and load.

Bakery Jatta · scores · wellness

WATCH

Robert Glatzel: Consistent injury risk (16–19) with moderate performance (41–52). Body soreness and mood stable. Lower risk than Poulsen and Jatta, but continued vigilance warranted given striker workload.

- Attacking midfielders recorded the highest external load across all GPS metrics (total distance, metabolic distance, explosive distance, high-speed running). Wingers and full backs also showed elevated volumes, consistent with their positional demands. Defensive midfielders displayed lower absolute distances, likely reflecting fewer GPS sessions during this period.

MONSTER ENERGY DRINK – NUTRITIONAL COMPOSITION

2026-03-01 → 2026-03-07

- Monster Energy (standard 500 ml can) typically contains: ~160 mg caffeine, ~54 g sugars (sucrose, glucose), taurine (~1000 mg), B vitamins (B2, B3, B6, B12), L-carnitine, inositol, and carbonated water. Energy content is approximately 210–230 kcal per can. High sugar and caffeine content may provide acute energy but should be consumed in moderation, particularly around training and competition.
