COACH REQUEST

Provide a training load report looking at Total Distance, Meaningful Distance, Z5 HSR, Z6 HSR & Explosive Distance. Report daily Acute chronic ratio using EWMA. Start this from 29th June 2026

MAUNA

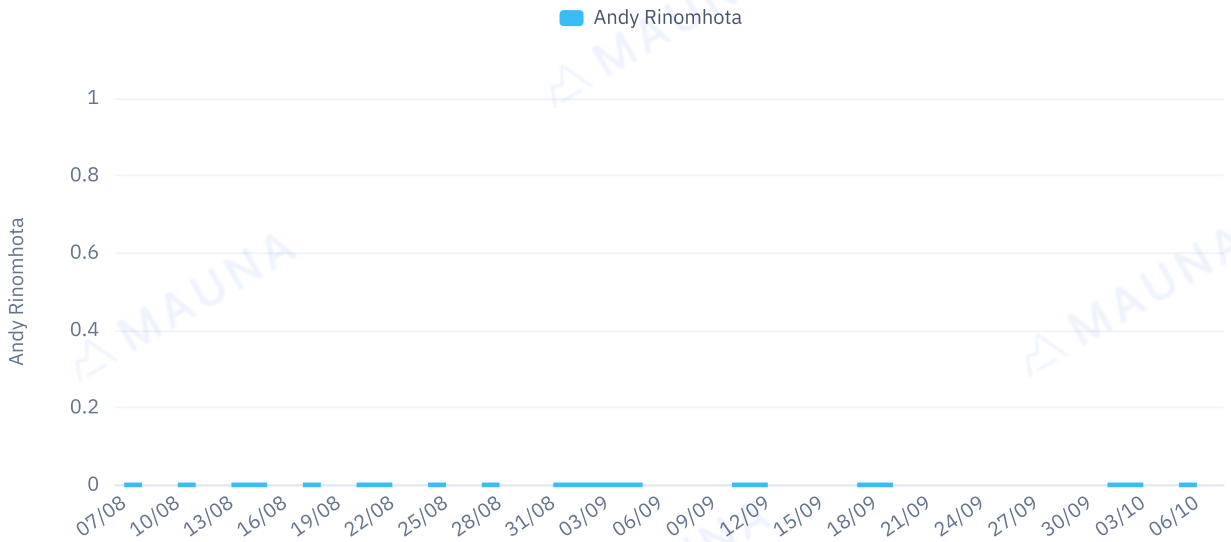

ACWR EWMA EVOLUTION

29 June–7 October 2026

Daily Acute:Chronic Workload Ratio (EWMA) tracked for all 24 players across the 101-day window. Individual line evolutions split into four groups provide context for acute-to-chronic load ratios. No fixed ACWR thresholds applied; outliers flagged relative to this cohort's observed distribution.

GPS INTENSITY METRICS — DAILY EVOLUTION

Total Distance, HMLD, Z5/Z6 HSR, Explosive Distance

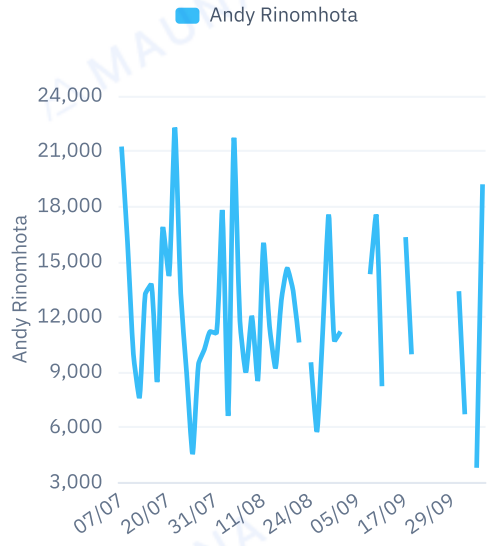

Individual line evolutions for Total Distance, High Metabolic Load Distance (HMLD), Zone 5 and Zone 6 High-Speed Running, and Explosive Distance tracked daily. Position-specific GPS analysis reveals midfielders averaging 640,729m total distance (highest), followed by attackers (539,893m) and defenders (421,080m). HMLD follows the same pattern, with midfielders averaging 114,645m of meaningful high-intensity distance.

CUMULATIVE RANKINGS — PERIOD TOTALS

29 June–7 October 2026

Liam Fraser leads cumulative Total Distance (820,396m) and HMLD (156,196m) across the period, with 63 GPS-tracked sessions. Daniel Kyerewaa (744,093m) and Randell Williams (742,539m) rank second and fourth for total distance. Zone 5 HSR rankings show Liam Fraser (49,545m), Daniel Kyerewaa (43,243m), and Paddy Lane (39,388m) leading high-speed running volumes. Zone 6 HSR is topped by Kyreece Lisbie (18,465m), Daniel Kyerewaa (16,542m), and Randell Williams (14,878m).

POSITION PROFILES — ROLE DEMANDS

Average GPS intensity by position

Position-specific GPS analysis reveals midfielders averaging 640,729m total distance (highest), followed by attackers (539,893m) and defenders (421,080m). HMLD follows the same pattern, with midfielders averaging 114,645m of meaningful high-intensity distance. Cross-domain integration of load and GPS data supports position-specific benchmarking and individual load management decisions.

PLAYER FOCUS — TOP PERFORMERS

info

LF **Liam Fraser**
MIDFIELDER

Highest cumulative Total Distance (820,396m), HMLD (156,196m), and Z5 HSR (49,545m) across the period. 63 GPS sessions reflect sustained availability and high external load. HMLD ratio 0.190 indicates high intensity per metre.

DK **Daniel Kyerewaa**
MIDFIELDER

Second-highest HMLD (138,839m) and Z5 HSR (43,243m). Leads Z6 HSR (16,542m) alongside Kyreece Lisbie. 61 sessions with high-intensity profile and HMLD ratio 0.187.

RW **Randell Williams**
MIDFIELDER

Highest max speed (9.45 m/s) and fourth for Total Distance (742,539m). Leads metabolic power (5.09 W/kg) and deceleration loading (566). 58 sessions with balanced high-speed and explosive distance exposure.

CS **Charlie Savage**
MIDFIELDER

Highest metabolic power (5.58 W/kg) and speed intensity (699.7). Third for HMLD (118,356m) with 47 sessions. Elevated physiological cost per session.

KL **Kyreece Lisbie**
ATTACKER

Leads Z6 HSR (18,465m) with 58 sessions. Second-highest max speed (9.36 m/s). High sprint distance relative to total volume indicates explosive running profile.
