Staff overview

NARRATIVE THREAD

- External load comparison shows wingers and full backs accumulated the highest sprint volumes this week, consistent with their tactical roles requiring repeated high-speed runs. Central defenders and midfielders recorded moderate sprint distances, while the single attacking midfielder observation limits positional inference.
- On the club's 10–60 scale (lower is better), Albert Grønbæk shows the best overall wellness profile with low soreness, mood, and sleep quality ratings. Several players including Bakery Jatta, Daniel Elfadli, and Damion Downs report elevated soreness and mood scores, warranting follow-up on recovery strategies.
- Monster Energy drink typically contains carbonated water, sucrose, glucose, citric acid, natural flavors, taurine (1000 mg per serving), sodium citrate, color added, panax ginseng root extract, L-carnitine, caffeine (160 mg per 16 fl oz can), sorbic acid, benzoic acid, niacinamide (vitamin B3), sodium chloride, glucuronolactone, inositol, guarana seed extract, pyridoxine hydrochloride (vitamin B6), sucralose, riboflavin (vitamin B2), maltodextrin, and cyanocobalamin (vitamin B12). Exact formulations vary by product line and region. For athlete-specific hydration and fueling strategies, consult with the club's sports nutritionist.

SIGNALS

INFO External load comparison shows wingers and full backs accumulated the highest sprint volumes this week, consistent with their tactical roles requiring repeated high-speed runs. Central defenders and midfielders recorded moderate sprint distances, while the single attacking midfielder observation limits positional inference.

INFO On the club's 10–60 scale (lower is better), Albert Grønbæk shows the best overall wellness profile with low soreness, mood, and sleep quality ratings. Several players including Bakery Jatta, Daniel Elfadli, and Damion Downs report elevated soreness and mood scores, warranting follow-up on recovery strategies.

INFO Monster Energy drink typically contains carbonated water, sucrose, glucose, citric acid, natural flavors, taurine (1000 mg per serving), sodium citrate, color added, panax ginseng root extract, L-carnitine, caffeine (160 mg per 16 fl oz can), sorbic acid, benzoic acid, niacinamide (vitamin B3), sodium chloride, glucuronolactone, inositol, guarana seed extract, pyridoxine hydrochloride (vitamin B6), sucralose, riboflavin (vitamin B2), maltodextrin, and cyanocobalamin (vitamin B12). Exact formulations vary by product line and region. For athlete-specific hydration and fueling strategies, consult with the club's sports nutritionist.

INFO No biomarker or VALD test data is available for December 2025 in the system.

INFO The scatter plot shows a positive correlation between sleep quality and mood ratings (both on the club's 10–60 scale where lower is better). Players reporting better sleep quality tend to report better mood states, highlighting the importance of sleep hygiene in overall wellness.

WHAT THE DATA ALLOWS

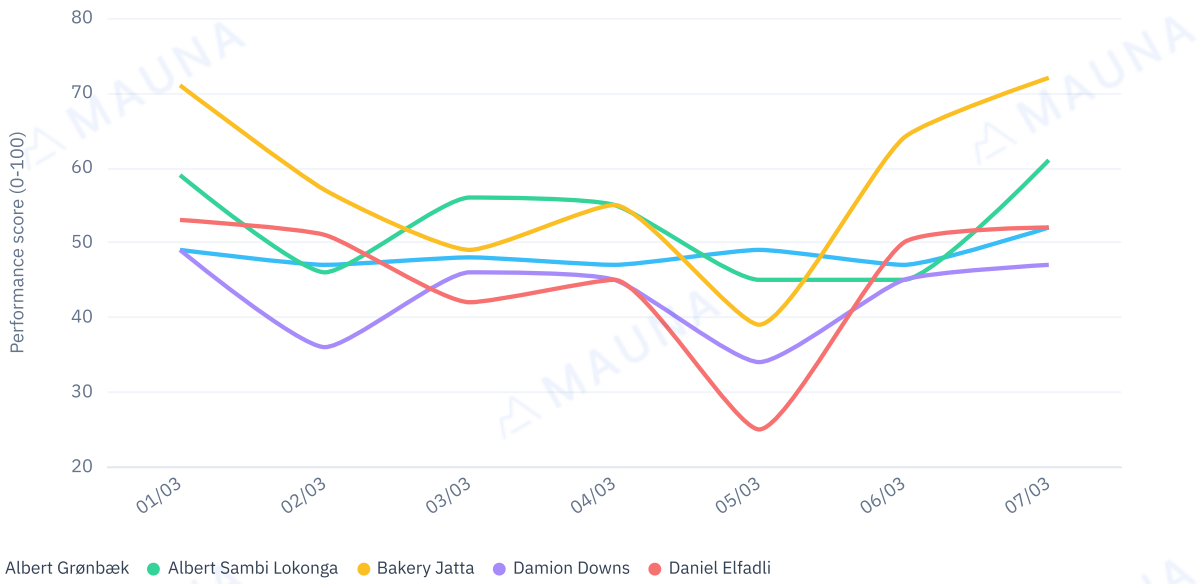

2026-03-01 → 2026-03-07

- Limit: location has no values. Limit: context has no values. Limit: status is constant (recovered) — treat as unreliable. Limit: energy rating has no values. Limit: stress rating has no values. Limit: wellbeing rating has no values. Limit: sleep efficiency percentage has no values. Limit: sleep consistency percentage has no values. Limit: hours in bed has no values. Limit: hours slow wave has no values.

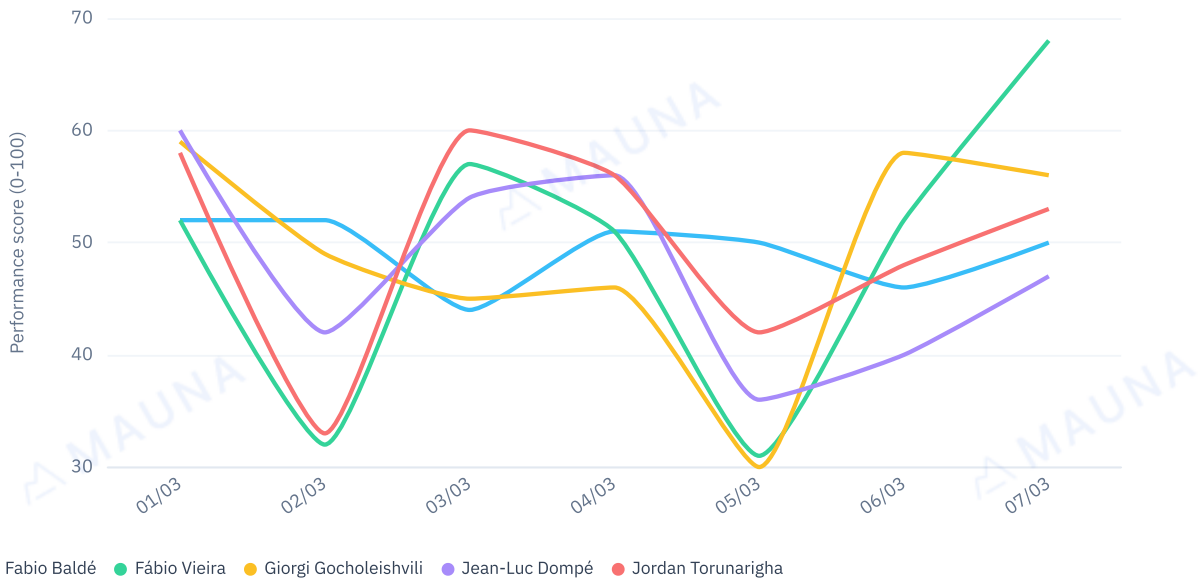

PERFORMANCE & INJURY RISK SCORES

2026-03-01 → 2026-03-07

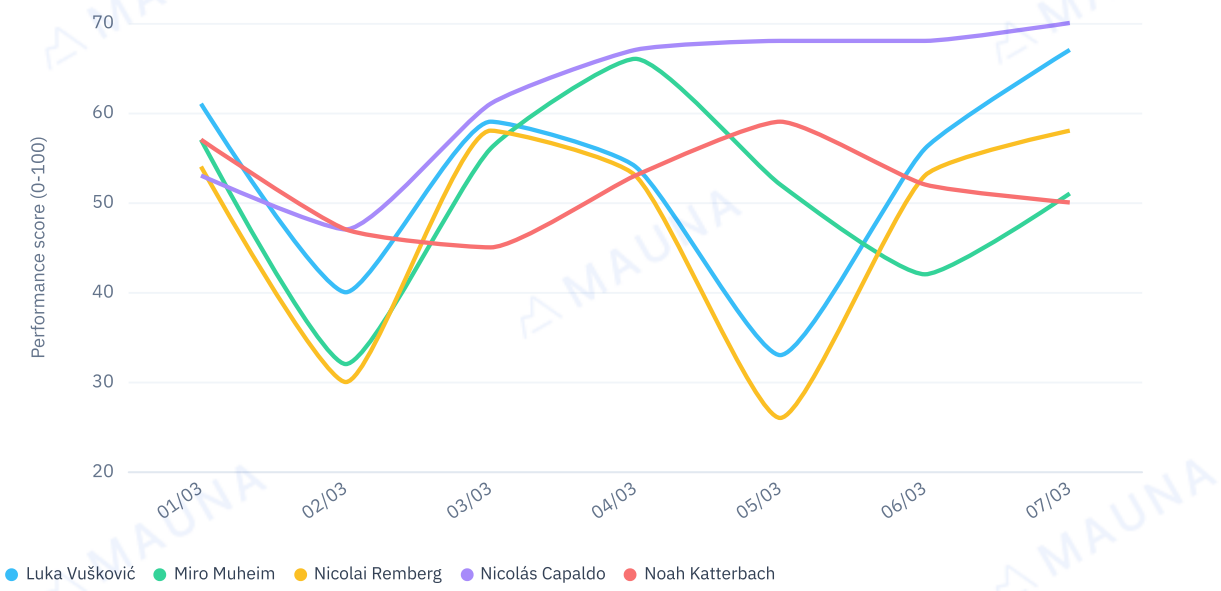

PERFORMANCE SCORE (1/5)

PERFORMANCE SCORE (2/5)

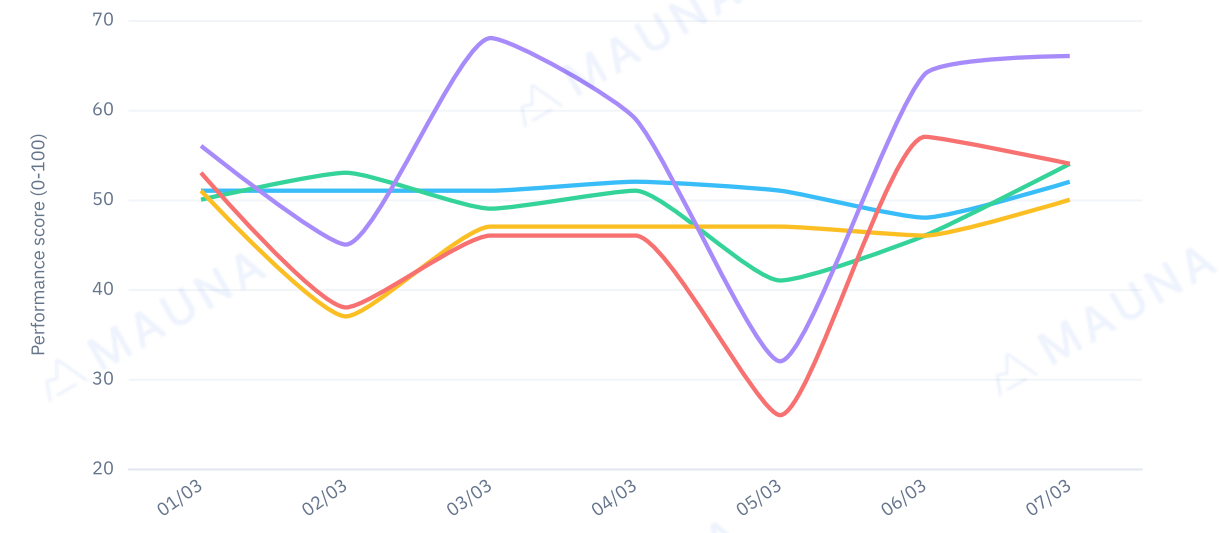

PERFORMANCE SCORE (3/5)

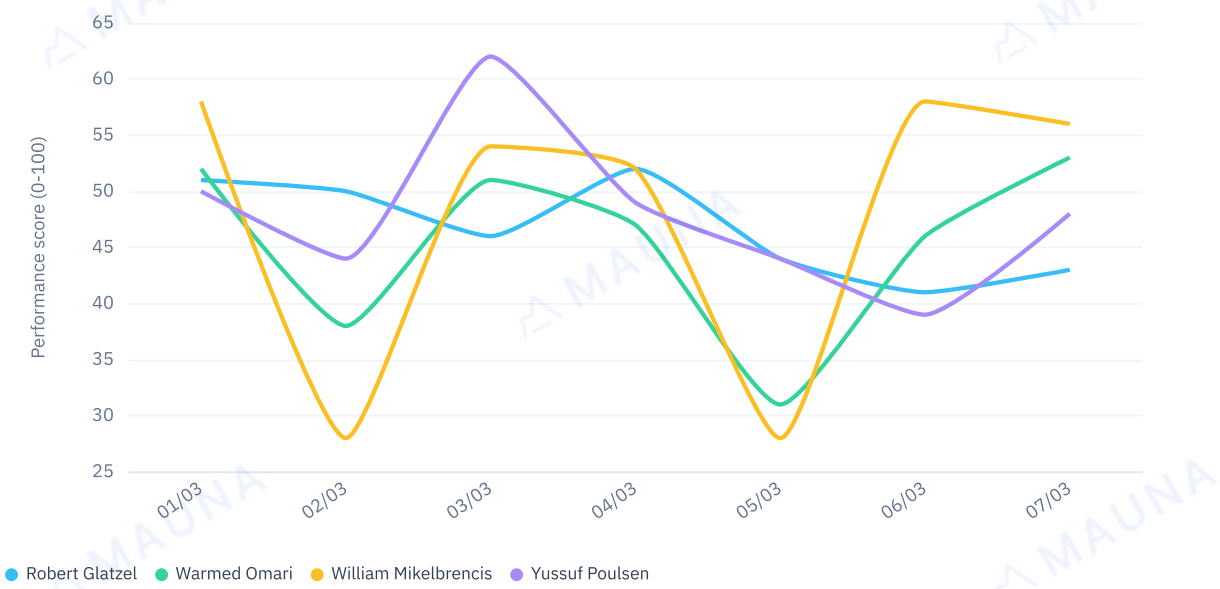

Luka Vušković · Miro Muheim · Nicolai Remberg · Nicolás Capaldo · Noah Katterbach

PERFORMANCE SCORE (4/5)

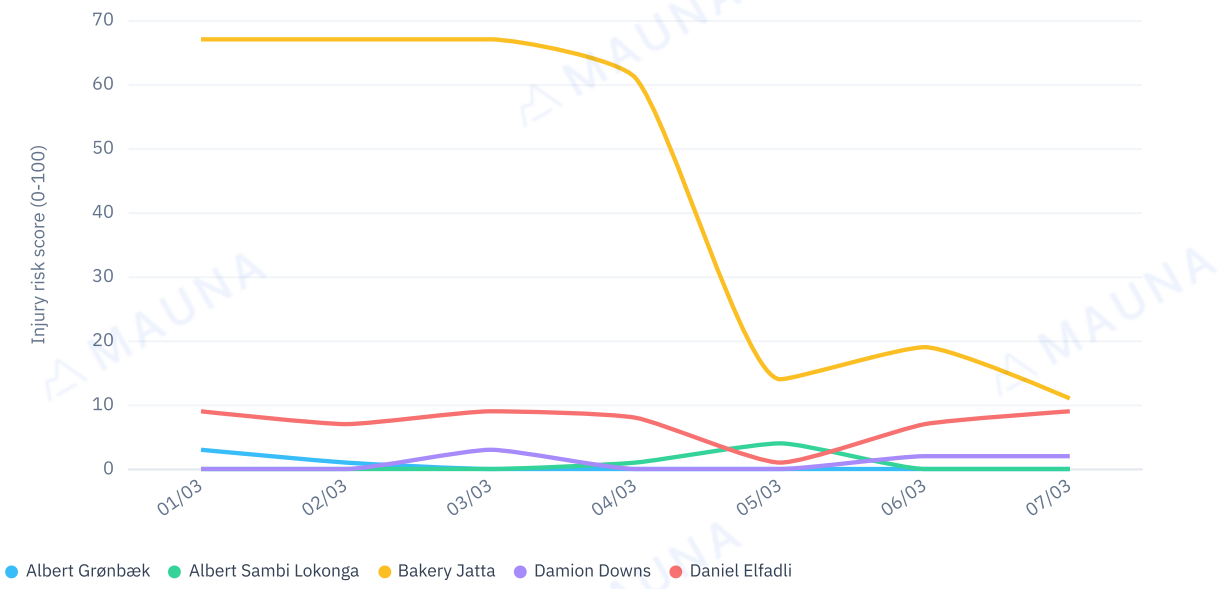

Omar Megeed · Otto Stange · Philip Otele · Ransford Königsdörffer · Rayan Philippe

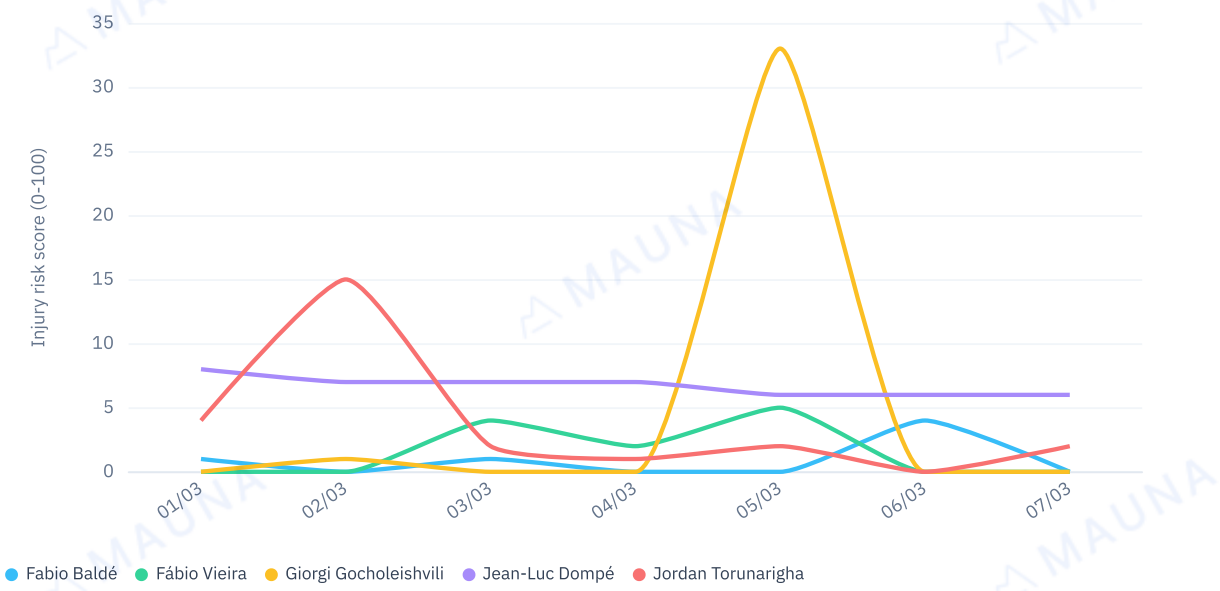

PERFORMANCE SCORE (5/5)

INJURY RISK SCORE (1/5)

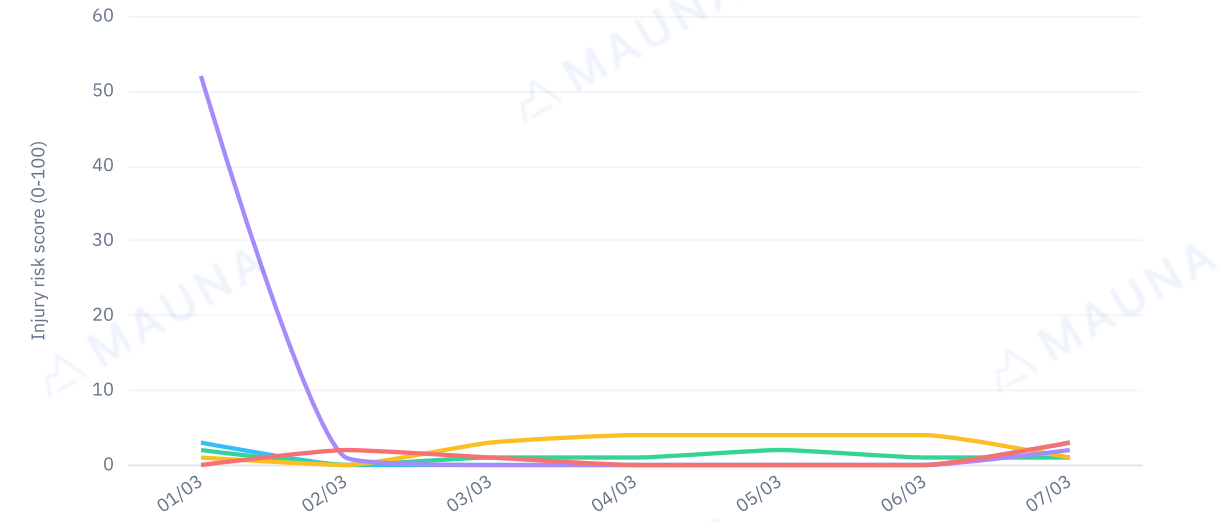

INJURY RISK SCORE (2/5)

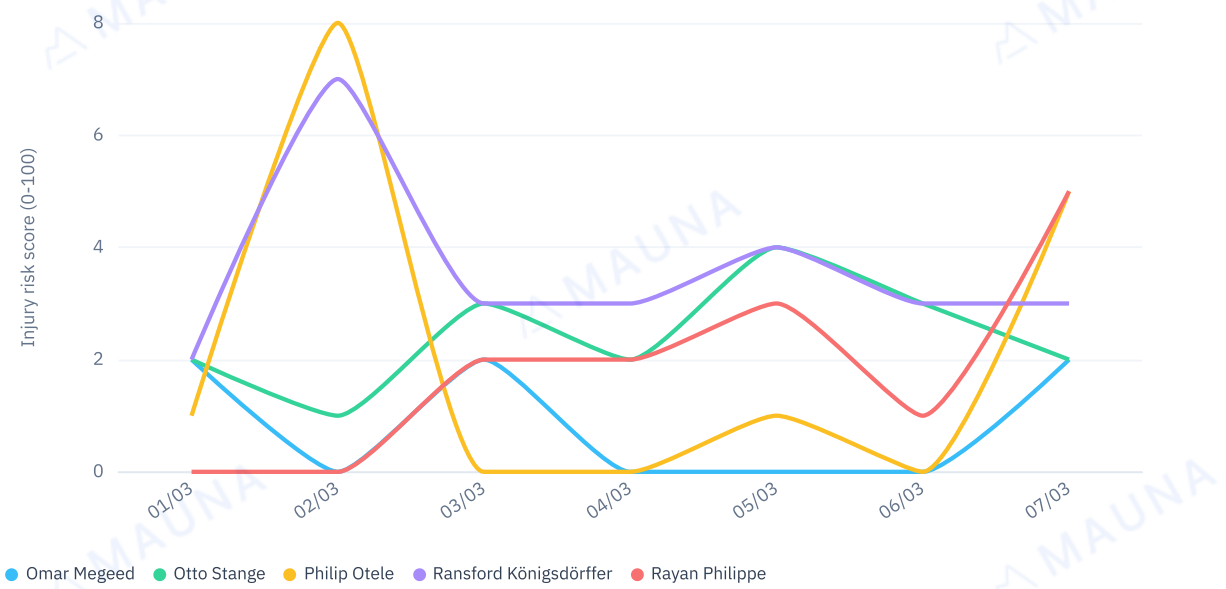

Fabio Baldé · Fábio Vieira · Giorgi Gocholeishvili · Jean-Luc Dompé · Jordan Torunarigha

INJURY RISK SCORE (3/5)

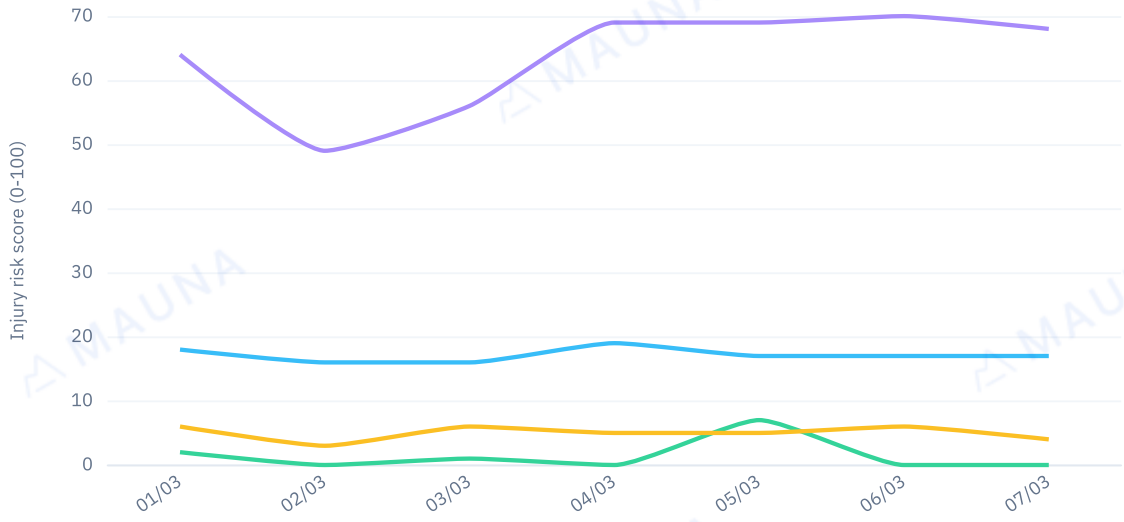

Luka Vušković · Miro Muheim · Nicolai Remberg · Nicolás Capaldo · Noah Katterbach

INJURY RISK SCORE (4/5)

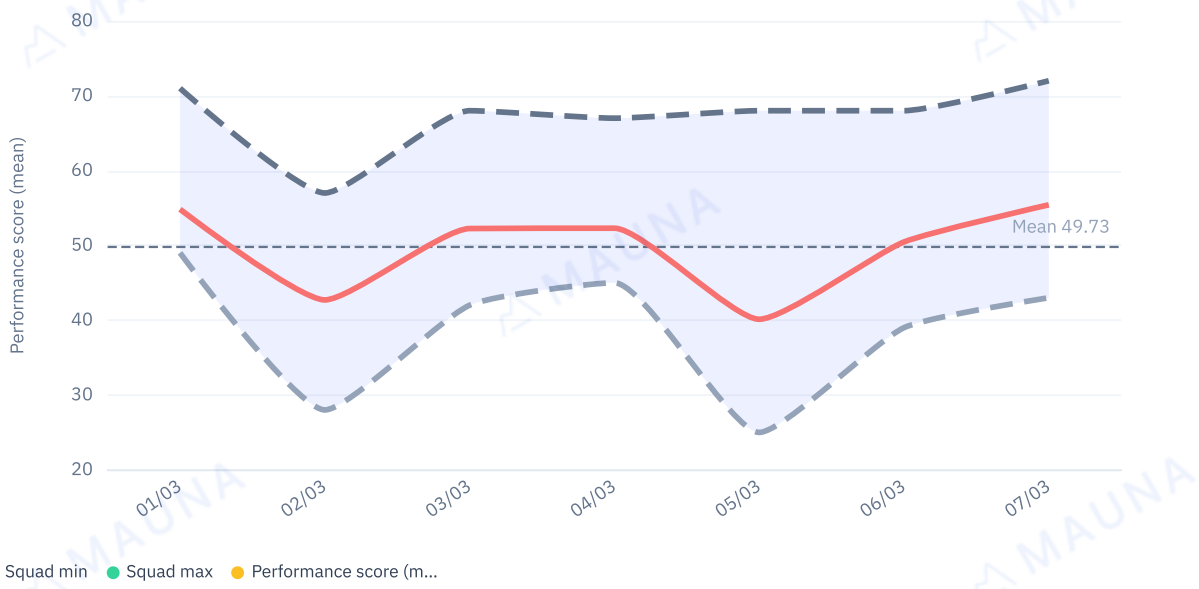

Omar Megeed · Otto Stange · Philip Otele · Ransford Königsdörffer · Rayan Philippe

INJURY RISK SCORE (5/5)

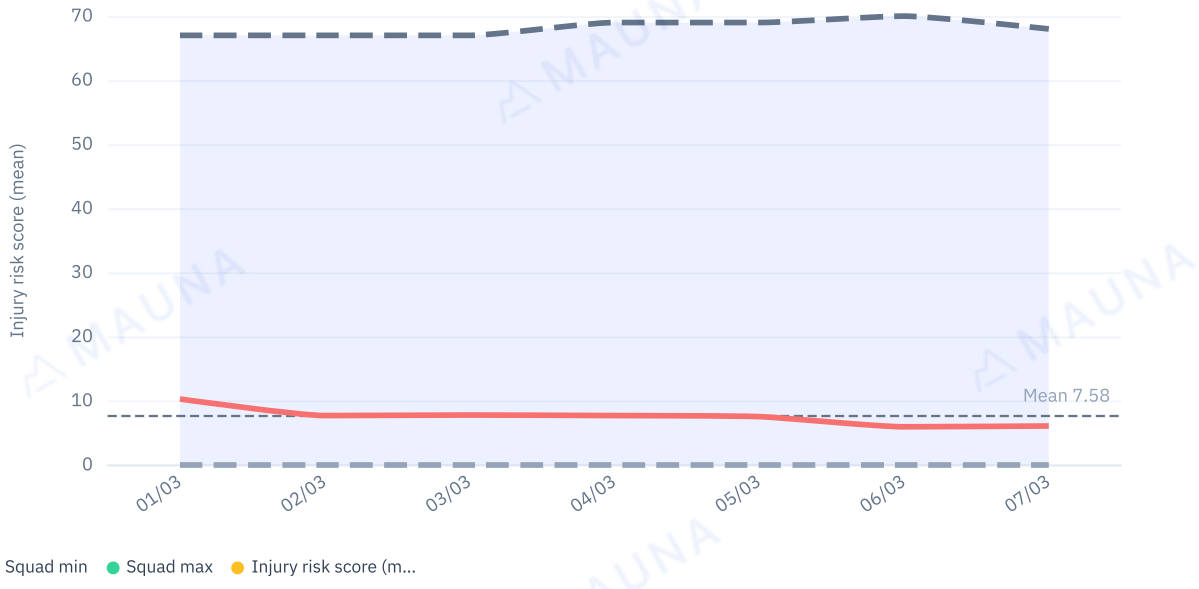

Robert Glatzel · Warmed Omari · William Mikelbrencis · Yussuf Poulsen

INJURY RISK SCORE — TEAM MEAN ± MIN-MAX

EXTERNAL LOAD BY POSITION

2026-03-01 → 2026-03-07

SPRINT DISTANCE BY POSITION (M)

- External load comparison shows wingers and full backs accumulated the highest sprint volumes this week, consistent with their tactical roles requiring repeated high-speed runs. Central defenders and midfielders recorded moderate sprint distances, while the single attacking midfielder observation limits positional inference.

SUBJECTIVE WELLNESS PROFILE

2026-03-01 → 2026-03-07

SUBJECTIVE WELLNESS PROFILE (25 FEB–7 MAR) (1/2)

SUBJECTIVE WELLNESS PROFILE (25 FEB–7 MAR) (2/2)

- On the club's 10–60 scale (lower is better), Albert Grønbæk shows the best overall wellness profile with low soreness, mood, and sleep quality ratings. Several players including Bakery Jatta, Daniel Elfadli, and Damion Downs report elevated soreness and mood scores, warranting follow-up on recovery strategies.

NUTRITION INFORMATION

2026-03-01 → 2026-03-07

- Monster Energy drink typically contains carbonated water, sucrose, glucose, citric acid, natural flavors, taurine (1000 mg per serving), sodium citrate, color added, panax ginseng root extract, L-carnitine, caffeine (160 mg per 16 fl oz can), sorbic acid, benzoic acid, niacinamide (vitamin B3), sodium chloride, glucuronolactone, inositol, guarana seed extract, pyridoxine hydrochloride (vitamin B6), sucralose, ribo...

BIOMARKERS & TESTING — DECEMBER 2025

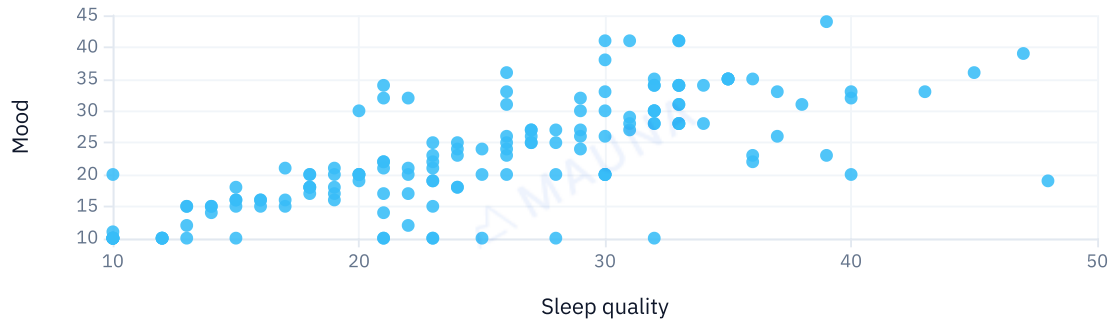

2026-03-01 → 2026-03-07

- No biomarker or VALD test data is available for December 2025 in the system.

SLEEP & MOOD RELATIONSHIP

2026-03-01 → 2026-03-07

SLEEP QUALITY VS MOOD RATING

- The scatter plot shows a positive correlation between sleep quality and mood ratings (both on the club's 10–60 scale where lower is better). Players reporting better sleep quality tend to report better mood states, highlighting the importance of sleep hygiene in overall wellness.

HIGH INJURY RISK ATHLETES

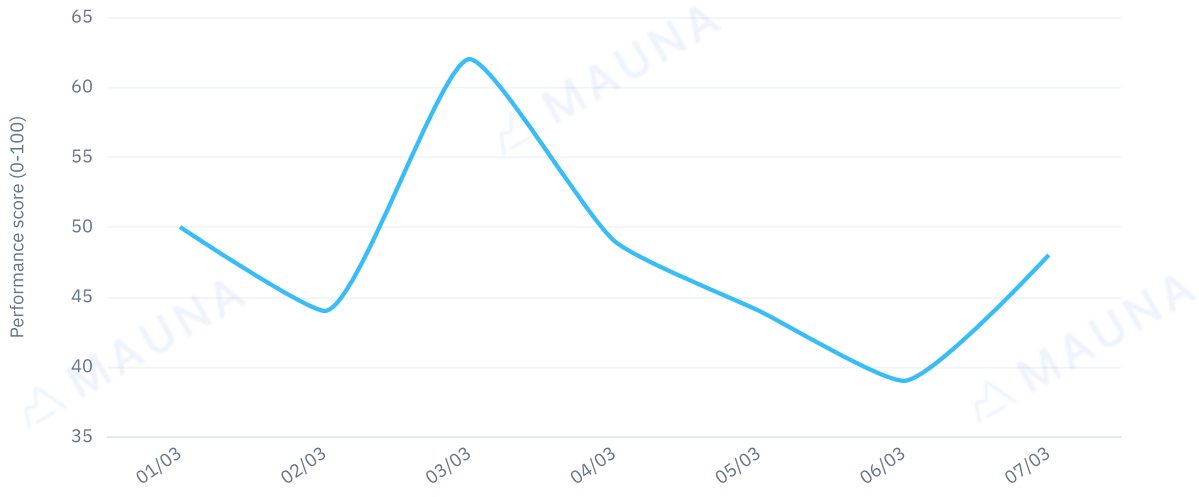

2026-03-01 → 2026-03-07

HIGH INJURY RISK ATHLETES — LATEST SCORES

PLAYER	DATE	PERFORMANCE SCORE (0-100)	INJURY RISK SCORE (0-100)
Yussuf Poulsen	2026-03-07	48	68
Bakery Jatta	2026-03-01	71	67

- Yussuf Poulsen shows the highest injury risk score (70/100 on 6 March), paired with a lower performance score (39/100). Damion Downs also appears in the watch group with elevated risk (68/100 on 7 March). Both athletes warrant close monitoring of training load and wellness indicators in the coming days.
