MAUNA

TRAINING LOAD & ACWR

24 Sep → 07 Oct

Training load (sRPE) showed varied patterns across the squad, with daily fluctuations captured in individual player evolutions and ACWR EWMA monitoring for acute-chronic workload ratios.

GPS INTENSITY & EXTERNAL LOAD

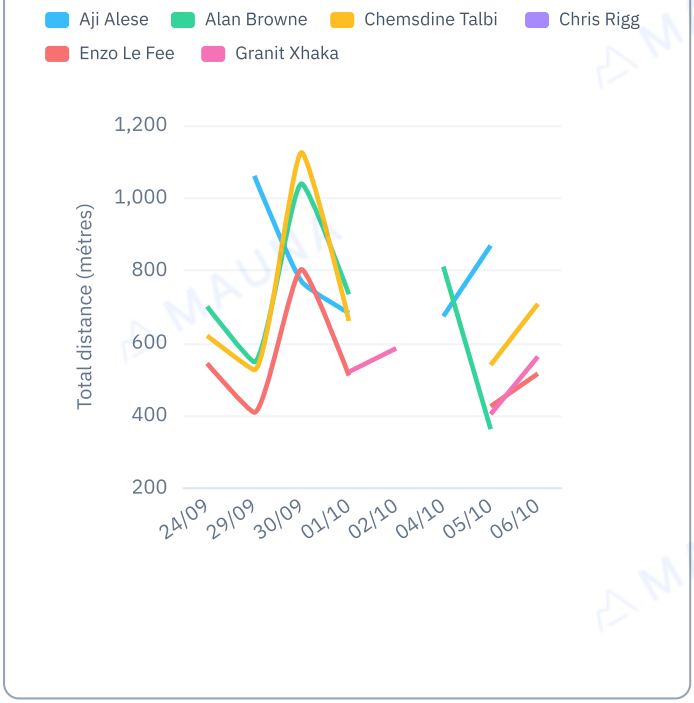

24 Sep → 07 Oct

GPS external load metrics (total distance, high metabolic load distance, sprint distance, and acceleration efforts) were tracked daily for active players, with position-specific breakdowns revealing intensity distribution across roles.

WELLNESS & SUBJECTIVE RATINGS

24 Sep → 07 Oct

Wellness subjective ratings (mood, energy, body soreness, stress) were collected from 12 players, with period means highlighting individual recovery states. Scales: Body Soreness 1–10 (higher is better), Energy 1–10 (higher is better), Mood 1–10 (higher is better).
